The Essence of the Vision

What is USF Health?

USF Health is an enterprise for change in the way we understand health and how it transforms our quality of life. Our mission is enhancing life by improving health through research, education and healthcare. Our commitment is to improve the full spectrum of health, from the environment, to the community, to the individual. Together, through talent and innovation, USF Health is developing real-world solutions to reach our shared value — making life better.

How do we do this?

Together
Our unique collaboration of research, education and healthcare creates partnerships both within our walls and with our affiliated institutions — our USF Health partners. Through the compassion and diversity of our people, we aim to create memorable relationships. We’re teaching students from different disciplines together.

Talent
With the most respected and diverse talent, working with a shared entrepreneurial spirit, we are creating real-world solutions to life’s problems. At USF Health, we have the leading researchers, educators and clinicians working together in a symbiotic relationship to turn science into health. The care of patients provided by USF Health is guided by research and focused on memorable experiences based on quality, service, safety and the continuum of care.

Innovation
Right now, we’re working on innovative solutions to change the future of the health profession. We’re incorporating the use of advanced technologies, which strengthens our abilities as caregivers. We’re using research to bridge the gaps in the healthcare system. This will lead to the creation of a national model for education and care devoted to the continuum of health. This combination of talent and innovation, efficiently working together, places us in a powerful position to anticipate tomorrow’s health needs today and develop breakthrough answers.

Why do we do all this?

Your health is our passion and the community’s future and we bring a unique combination of strengths from many disciplines devoted to health.

Through our partnerships, we’ve created a new model for learning that empowers health professionals to discover better health solutions. We do this to enhance and protect the lives of everyone we touch — yours, ours, within our community and throughout the world.
