| <b>Stethoscope</b> meeting the following requirements: adult dual head (bell & diaphragm) – <u>not</u> electronic; short tubing (about 27 inches) – any longer length sounds too quiet, less distinct; tubing should be flexible for folding into lab coat pocket. We recommend that you purchase a high-quality stethoscope that will serve you throughout your career, such as the Littman Classic II SE, which costs about \$70-80. If desired, the class can work together to obtain a group discount from medical suppliers. |  |                              |                                  |                            | F, S     |
