## COMPARISON: CHARACTERISTICS OF HUMAN SUBJECT RESEARCH VS. QUALITY IMPROVEMENT, PROGRAM EVALUATION, OR CLASS/STUDENT

**PROJECTS** Determining whether a project requires IRB review depends on whether it constitutes research involving human subjects (first column). Please contact the USF IRB Office (813-974-5638) with any questions or for assistance in making a determination.

practice or process winth a particular for and about the setting in which it is expected norms:  Project occurs regardless of whether and individual(s) conducting it may benefit professionally from conducting the professionally from conducting the professionally from conducting the professionally from conducting the project.  We to to generalizable knowledge; generally does not involve randomization to does not involve andomization or does not involve andomization or different practices or processes  Activity mandated by the institution or directly affect on thicking a part of its operations.  Activity mandated by the institution or directly affect the conducting the professionally from conducting the professionally from conducting the professionally from conducting the project.
