Presents

Germaine Buck Louis, PhD, MS

National Institute of Health

Division of Epidemiology, Statistics & Prevention Research

*"Couple-based Approaches for Assessing Human Fecundity
and Fertility - Males Matter"*

Friday, September 21, 2012

12:00 pm

COPH 1023-A Samuel P. Bell, III Auditorium

Germaine Buck-Louis is currently the Senior Investigator and Director of the Division of Epidemiology, Statistics and Prevention Research (DESPR), Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD), of the National Institutes of Health. She was formerly a professor for 13 years in the Department of Social and Preventive Medicine, University of Buffalo. Dr. Louis received her master's degree and PhD from the University of Buffalo. Her research interests primarily focus on the interplay between environmental exposures, behavior and human reproduction and development. She has been an active member of several epidemiologic societies, including her service as Secretary, then President, of the Society of Perinatal and Pediatric Epidemiologic Research and board member of the American College of Epidemiology and the International Society of Environmental Epidemiology. She has served on a number of committees, panels and boards for The National Academies, the US Environmental Protection Agency, and the World Health Organization. Currently, she is an investigator on the Upstate KIDS Study focusing on the interplay between infertility and associated treatment and children's development through age three years.
