

**Curriculum Vitae**

Bruce Gilbert Lindsey

Professor Emeritus  
 Department of Molecular Pharmacology & Physiology  
 Morsani College of Medicine  
 University of South Florida  
 12901 Bruce B. Downs Blvd.  
 Tampa, Florida 33612-4799 U.S.A.

E-mail: [blindsey@health.usf.edu](mailto:blindsey@health.usf.edu)  
 Phone: 813-974-2590  
 Fax: 813-974-3079

**Education**

Undergraduate: 1967-1971     B. A., Magna cum laude with highest honors in Biology, 1971  
 Williams College, Williamstown, Massachusetts

Graduate: 1971-1974     Laboratories of Prof. C. N. Liu and Prof. W. W. Chambers  
 Ph.D. 1974, Institute of Neurological Sciences and Department of Anatomy  
 School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania

Postdoctoral: 1974-1977     Laboratory of Prof. G. L. Gerstein  
 Research: Neurophysiology and Computational Neuroscience  
 Department of Physiology, School of Medicine, University of Pennsylvania

**Appointments and professional experience**

2017     Professor Emeritus

2007-2017     Distinguished University Health Professor

2006-2010     Chair of the Department of Molecular Pharmacology and Physiology, USF COM

2006-2017     Professor of Molecular Pharmacology and Physiology, Morsani College of Medicine, USF

2001- 2003     Interim Vice-President for Research, USF

1998-2000     Chair, Neuroscience Concentration Committee, Ph.D. in Med. Sci. Prog., USFHSC

1997- 2017     Professor of Neuroscience, Founding member, Neuroscience Program, USF

1996- 2006     Chair of the Department of Physiology and Biophysics, USFHSC

1992-1996     Interim Chairman, Department of Physiology and Biophysics, USFHSC

1988- 2006     Professor of Physiology and Biophysics, USFHSC

1983-1988     Associate Professor of Physiology, USFHSC

1977-1983     Assistant Professor of Physiology, USF Health Sciences Center

1974-1977     NIH Postdoctoral Fellowship, Department of Physiology, University of Pennsylvania

1971-1974     Graduate studies, University of Pennsylvania

1970     Summer Research, Mt. Desert Island Biological Laboratory, Salisbury Cove, Maine

1967-1971     Scholarship, Williams College, Williamstown, Massachusetts

**Honors**

2007     Distinguished University Health Professor – University of South Florida

2005     Outstanding Faculty Research Achievement Award – University of South Florida

2004     Sigma Xi

2004     Javits Neuroscience Investigator Award, NINDS, NIH

1996     Elected Chair, Central Nervous System Section, American Physiological Society

1971-1974     University Fellowships, University of Pennsylvania

1971     Connant Harrington Prize in Biology, Williams College

1970 Phi Beta Kappa

**Teaching**

*BMS 6641* Medical Neuroscience  
*BMS 6020* Medical Neuroscience (Course Co-Director 1994-1999)  
*BMS Course 2* Neurological Systems  
*BMS 6500* Medical Physiology (Course Director 1986-1988)  
*GMS 6091* Responsible Conduct in Research  
*GMS 6772* Spinal Cord: Development, Pathology, and Therapy  
*GMS 6461* Systems Physiology & Pharmacology  
*GMS 6020* Graduate Neuroscience (1998 - 2000, Chair, Neuroscience Concentration Committee)  
*GMS 7910* Directed Research  
*GMS 7980* Doctoral Committees  
*GMS 7930* Selected Topics: Survival Skills and Ethics for Biomedical Graduate Students; Advanced Concepts in Systems Physiology; Physiology Seminar; Computer Languages  
*GMS 7939* Graduate Seminar  
*GMS 6400* Graduate Core Course in Physiology  
*GMS 6404* Systems Neurophysiology  
*GMS 6494* Introduction to Physiological Research  
*GMS 6706* Basic Medical Neuroscience (Course Director, 2011-2013)  
 Other courses: Cellular Neurophysiology, Membrane Physiology, Advanced Physiologic Assessment (Nursing), Residency Programs in Neurology and Internal Medicine (Pulmonary and Allergy – Immunology); Medical Honors Program; Service as medical student advisor (2010-2012)

**Graduate student dissertation advisor, co-advisor Subsequent or current position**

Lauren Segers	Research Associate University of South Florida
Kendall F. Morris	Professor University of South Florida
Zhongzeng Li	Chief Resident in Neurology Medical University of South Carolina
Donald Bolser	Professor University of Florida
David Baekey	Assistant Professor University of Florida
Mackenzie Ott	Postdoctoral Fellow Global Center for Speech and Hearing Research University of South Florida
M. Jason Highsmith	Assistant Professor University of South Florida

**Committee member or external examiner for:**

Christian Gestreau	Maître de Conférence, CRN2M, Département PNV, MP3-Respiration, Université Aix-Marseille II & III, Marseille, France
Terrence C. Town	Faculty Research Scientist II, Department of Biomedical Science and the Maxine Dunitz Neurosurgical Institute, Cedars-Sinai Medical Center
Charles N. R. Henderson	Associate Professor Palmer College of Chiropractic Medicine

Cristina Jaén	Postdoctoral Fellow Monell Chemical Senses Center
John Canfield	Current graduate student
<b>Visiting students, post-doctoral fellows, research associates:</b>	<b>Subsequent or current position</b>
Charles Brock	Associate Dean of VA Affairs for the USF College of Medicine
Yvonne M. Hernandez	Associate Professor, Department of Pharmacology Georgetown University School of Medicine
Akiko Arata	Division of Physiome, Department of Physiology, Hyogo College of Medicine, Japan and RIKEN Brain Science Institute
Sarah Nuding	Senior Research Associate University of South Florida
Julie A. Jacques	Physician
Jerry Koleski	Physician
Ulysses J. Balis	Professor of Pathology and Director, Division of Pathology Informatics, University of Michigan
Eugene Chang	Medical student, Baylor College of Medicine
Kimberly Iceman	Assistant Professor, Department of Biology, Valparaiso University
<b>Thesis Committees</b>	<b>College of Engineering</b>
Chaitanya Damle	College of Engineering

### **Research**

#### *Overview of research*

I have a long-standing interest in the analysis of neural circuits and sensory-motor integration. Early work begun as a post-doctoral fellow with George Gerstein described interactions among simultaneously recorded ensembles of sensory and motor neurons in the crayfish. Intracellular recordings and perturbations together with various statistical methods for spike train analysis revealed evidence for roles of spike timing and synchrony in the “ensemble coding” and gain control of parallel proprioceptive input channels and the generation of motor neuron proprioceptive fields.

My subsequent research with students and colleagues since the early 1980s has focused on defining functional connectivity in the mammalian brain stem networks for breathing and airway protective behaviors. We have identified circuit operations that tune that motor pattern during changes in blood pressure and blood gases, with selective perturbations of baroreceptors and peripheral or central chemoreceptors, and following acute challenge-evoked exacerbations that mimic aspects of asthma. To accomplish this work, we developed or enhanced multi-array recording technologies and high-throughput methods for parallel spike train analysis for

the identification of functional connectivity and some aspects of its dynamics. Associated computational models of the network were iteratively informed by our experiments that were, in turn, guided by model-derived predictions and hypotheses.

Our early work, based upon cross-correlation of parallel spike train recordings, identified interactions within and between the ventrolateral medulla and pons. Subsequently, we detected a "rostral-to-caudal polarity" of "I-Driver" neuron excitation from what subsequently came to be called the pre-Bötzinger complex. These results motivated subsequent studies that detected evidence for additional inter-areal connectivity, efference copy of inspiratory drive, and parallel circuits for pontomedullary interactions, including pathways through intervening raphé neurons. This work also informed the development of the first data-driven computational network models composed of discrete spiking "integrate-and-fire" neuronal populations for generation of the motor patterns for breathing and coughing. More recently, we made a stochastic network model linked to a closed-loop deterministic biomechanical model of the lungs and respiratory muscles.

We also detected evidence for circuit mechanism for the modulation of breathing by multiple sensory systems, including the first evidence for baroreceptor-evoked push-pull tuning of inspiratory drive by raphé neurons via tonic expiratory neurons in and around the ventral respiratory column. Gravitational clustering analysis demonstrated respiratory-phase dependent spike synchrony among medullary raphé neurons without respiratory modulation of their individual firing rates. This observation suggested a multiplexing of rate and synchrony "codes" in parallel spike trains. Subsequently, we identified repeated patterns of distributed neuronal spike synchrony and transient neuronal assembly configurations, both during baroreceptor stimulation and with carotid chemoreceptor-evoked induction and expression long-term facilitation of inspiratory drive – a respiratory "memory" associated with repeated transient episodes of hypoxia, as found in sleep disordered breathing.

Time series and frequency domain analyses identified pontine and raphé neuron firing rate modulations with a 0.1-Hz rhythm coherent with blood pressure Mayer waves. These "Mayer wave-related oscillations" (MWROs) were coupled with central respiratory drive and became synchronized with the central respiratory rhythm after vagotomy. Cross-correlation analysis identified functional connectivity between pairs of neurons with MWROs. Collectively, the results suggest that a distributed network participates in the generation of MWROs and in the coordination of respiratory and vasomotor rhythms.

A current goal of our group is to define network-scale operations that tune the motor pattern for breathing during perturbations of blood gases. We have identified functional connectivity supporting multi-path tuning of the respiratory motor pattern by both peripheral and central chemoreceptors and circuit mechanisms for active suppression of breathing during hypocapnic apnea.

#### *Research Fellowships*

Post-doctoral                    F22 NS00220 (1974-76) and F32 NS05650 (1976-77)

#### *NIH Research Grants*

Project Title:                    ***Ensemble Neural Coding NS 14934 (1979-82)***

Source of Support:                NIH/NINDS

Role:                                Principal Investigator

Project Title:                    ***Cutaneous Microvascular and Macrovascular Responses HL 24151 (1980-83)***

Source of Support:                NIH/ NHLBI

Role: Co-Investigator (C. Baker, PI)

Project Title: **Respiratory Muscle Afferents in Respiratory Control HL 17715 (1980-88)**  
Source of Support: NIH/ NHLBI  
Role: Co-Investigator (R. Shannon, PI)

Project/Proposal Title: **Adverse Events: Quantitative Risk Assessment Tool 1S07RR018262-01 (2002-2003)**  
Source of Support: NIH  
Role: Initial Principal Investigator, Office of Research (09/01/02-01/30/03)  
Project Location: University of South Florida, Office of Research

The goal of this project was to enhance and strengthen the human subjects protection program at the University of South Florida (USF) through the development and implementation of an electronic submission and tracking system for evaluating and coordinating adverse event (AE) reporting.

Project Title: **Brainstem Neural Networks and Airway Defensive Reflexes 2 R01 HL49813 (1994-2003)**  
Source of Support: NIH/ NHLBI  
Role: Co-Investigator (R. Shannon, PI)  
Project Location: University of South Florida, College of Medicine

The major goal of this project was to define mechanisms of airway defensive reflexes, including cough and the expiratory reflex.

Project Title: **Computational Studies of the Respiratory Brainstem 1 R01 NS46062-02 (2002-2008)**  
Source of Support: NIH/NINDS under the NSF-NIH Collaborative Research in Computational Neuroscience Program  
Role: Principal Investigator  
Project Location: University of South Florida, College of Medicine

This collaborative project brought together researchers from universities in five states to develop a unified model of the brainstem respiratory network. Simulated populations of respiratory neurons with realistic biophysical properties and computationally efficient large-scale simulations were used to integrate current knowledge about complex and nonlinear systems, provide a framework to test and predict the consequences of defined perturbations, and generate testable hypotheses. Associated *in vivo* and *in vitro* experiments tested model-based hypotheses on cellular, network and systems level mechanisms that transform the respiratory network during the transitions between eupnea and hyperventilation apnea, from eupnea to gasping, and during sleep and waking. The project also served as a catalyst for the development and sharing of computational methods, modeling and simulation tools, and large data sets.

Project Title: **US - JAPAN Brain Research Cooperative Program Workshop: The NeuroPhysiome: Bridging computational neuroscience and systems biology (2010)**

Source of Support: NIH/NINDS  
Role: Principal Investigator  
Meeting location: Okinawa Institute of Science and Technology, Japan  
The workshop (October 3-6, 2010) at the Okinawa Institute of Science and Technology) considered the apparent disconnect between computational neuroscience and molecular systems biology. Topics included the commonalities and multi-scale modeling of cellular and molecular processes and neuronal systems physiology and how robust function emerges from complex, plastic processes. The workshop brought together members of the systems biology

and computational neuroscience communities with the goal of developing new collaborations between scientists and students from the US and Japan.

Project Title: ***Neurogenesis of Cough R33 HL089104-01A1 (2008-2012)***  
Source of Support: NIH/NHLBI  
Role: Co-Investigator (K. Morris, PI)  
Project Location: University of South Florida, Morsani College of Medicine

Cough is an essential component of pulmonary defense and is the most common manifestation of lung disease. Cough is the single most common reason why sick patients visit physicians in the United States. The goal of this research was to delineate the brainstem mechanisms by which cough is produced and regulated.

Project Title: ***Central Mechanisms of Airway Protection 1R01HL103415-04 (2010 - 2015)***  
Source of Support: NIH/NHLBI  
Role: Principal Investigator (Multi-PI) with D. Bolser, (UF, contact), P. Davenport (UF), and K. Morris (USF)  
Project Location: University of South Florida Morsani College of Medicine and University of Florida

The long-term goal of this project was to define brainstem mechanisms that control and coordinate cough and swallow.

Project Title: ***Mechanisms of Swallow Control of Breathing 1R01HL109025-01A1 (2012-2016)***  
Source of Support: NIH/NHLBI  
Role: Co-Investigator (Paul Davenport - UF, Kendall Morris- USF, PIs.)  
Project Location: University of Florida and University of South Florida Morsani College of Medicine

Dysphagia - difficulty in swallowing - commonly results in penetration and aspiration of bolus material into the lower airways, thereby contributing to a major cause of morbidity and mortality after a stroke or with neuromuscular disease. This project will increase our understanding of the basic neural mechanisms that integrate swallow and breathing and the respiratory-related neural mechanisms of dysphagia rehabilitation.

Project Title: ***Brainstem Respiratory Neuron Interactions 2 RO1/R37 NS019814-30 (1984 - 2017)\****  
Source of Support: NIH/NINDS  
Role: Principal Investigator  
Project Location: University of South Florida, College of Medicine  
\* 2004-2011, Javits Neuroscience Investigator (R37 MERIT) Award.

The goal of this project was to define the local and distributed effective connectivity of brainstem respiratory neurons involved in the peripheral and central chemoreceptor modulation of breathing. We also tested model-based predictions on network mechanisms that regulate breathing during hypocapnia and acute challenge-evoked exacerbations in an established sensitized animal model of asthma.

9. Invited speaker, Featured Topics: *The medullary raphé: Such an obvious role in respiratory control, but what exactly is it?* Experimental Biology, 1999.
10. Invited speaker, "Neuronal Assemblies and Dynamical Systems: A Conference Honoring George Gerstein". University of Pennsylvania, 2003.
11. "Functional Connections among Ponto-medullary Respiratory Neurons", American Physiological Society Symposium at Experimental Biology 2004.
12. Invited participant, *Principal Investigators meeting of the Collaborative Research in Computational Neuroscience Program*, National Science Foundation, 2005.
13. Invited participant, *Principal Investigators meeting of the Collaborative Research in Computational Neuroscience Program*, National Science Foundation, 2006.
14. Symposium speaker: "Network dynamics in the reconfiguring and re-emerging respiratory network" presented at the *First International Congress of Respiratory Biology*, Bonn Germany, 2006.
15. Participant in the "UK Spike Train Analysis Workshop- An international neuroscience workshop on spike train analysis", Institute of Neuroscience, Newcastle University, England, 2006.
16. Theme Leader and symposium speaker on "Multifunctional- reconfiguring networks. Overview: network reconfiguration over different time scales" for the *Xth Oxford Conference on Modeling and Control of Breathing*, Canada, 2006.
17. Invited speaker, Featured Topics: "Emerging properties and concepts in respiratory rhythm generation", Experimental Biology 2007, Washington, D. C., 2007.
18. Invited participant, *Principal Investigators meeting of the Collaborative Research in Computational Neuroscience Program*, University of Maryland, 2007.
19. Invited speaker at the Royal Society Discussion Meeting, "Brainstem: neural networks vital for life", London, UK, 2008.
20. Invited speaker at Virginia Commonwealth University/Center for the Study of Biological Complexity NHLBI Workshop on "Modeling Neuromuscular Control of the Cardiovascular and Cardiopulmonary Systems", 2010.
21. Invited speaker at the US - JAPAN Brain Research Cooperative Program Workshop "The NeuroPhysiome: Bridging computational neuroscience and systems biology", Okinawa Institute of Science and Technology, Japan, 2010.

22. Invited speaker in Featured Topic: “*Multiscale neuronal control of respiratory function: Bridging gene networks to neural networks*”, Experimental Biology 2011, Washington, D. C., 2011.
23. Invited participant, 2011 Multi-scale Modeling Consortium/NHLBI Systems Biology Meeting, The Interagency Modeling and Analysis Group, NIH Bethesda, MD, 2011.
24. Invited Speaker, Symposium: “*Computational modeling in central respiratory control and CO<sub>2</sub> chemoreception*”, Experimental Biology 2012, San Diego, CA, 2012.
25. Invited participant, The XII<sup>th</sup> Oxford Conference on Breathing: *Breathing, emotion and evolution*, Almelo, Netherlands, 2012.
26. Invited speaker, “Persistent and evoked activities during the dissolution and reemergence of brainstem respiratory network rhythms with hyperventilatory apnea”, The XIII<sup>th</sup> Oxford Conference on Breathing, Sydney Australia, 2014.
27. Invited speaker, “Carotid chemoreceptor tuning of the brainstem respiratory network: Reticular loops and chains revisited”, The XIV<sup>th</sup> Oxford Conference on Modelling and Control of Breathing, Merton College Oxford, UK, 2017.

#### **Invited Research Seminars**

Department of Physiology, Royal Free Hospital, London  
Institute of Neurology, London  
Brain Research Institute, UCLA  
Neural Computation Group, E. I. DuPont de Nemours  
Department of Medicine, Robert Wood Johnson Medical School  
Department of Physiology, Northwestern University Medical School  
David Mahoney Institute of Neurological Sciences, University of Pennsylvania  
Department of Anesthesia, Medical College of Wisconsin  
Department of Pharmacology, University of South Florida  
Department of Physiological Sciences, University of Florida  
University of Wisconsin, Madison  
Neuroscience Program, Michigan State University  
Department of Physiology, Texas Tech University  
Department of Physiology, Stritch School of Medicine, Loyola University  
Department of Medicine, Case Western Reserve University School of Medicine  
Department of Molecular Medicine, Morsani College of Medicine, USF  
Department of Molecular and Systems Biology, Geisel School of Medicine, Dartmouth

#### **Professional Societies**

1971-present American Association for the Advancement of Science  
1981-present American Physiological Society  
1976-2016 Society for Neuroscience  
1992-2010 Association of Chairs of Departments of Physiology

#### **Service**

*National and professional service*

American Physiological Society Committee Service: Central Nervous System Section Steering Committee (1994-1999; 2001-2002; 2005-2007; Chair, 1996-1999); Committee on Committees (1996-1997); Section Advisory Committee (1996-1999); Nominating Committee (1996-1998); Awards Committee (2000-2002); Long-Range Planning Committee (2005-2007); Task Force on Governance (2006-2007).

Research host: Frontiers in Physiology Program for high school teachers, American Physiological Society: 2004, 2007.

External reviewer of the Department of Cellular and Integrative Physiology, University of Nebraska Medical School (2005).

Young Investigator Awards Selection Committee, the X<sup>th</sup> Oxford Conference on Modeling and Control of Breathing, (2006).

International program committee for the Joint Meeting of the International Society for Autonomic Neuroscience (ISAN) and the American Autonomic Society (AAS), Brazil, 2011.

Reviewer for:

*American Journal of Physiology*  
*Anesthesiology*  
*Autonomic Neuroscience*  
*Brain Research*  
*Experimental Brain Research*  
*Experimental Neurology*  
*Experimental Physiology*  
*Journal of Applied Physiology*  
*Journal of Computational Neuroscience*  
*Journal of Neurophysiology*  
*Journal of Neuroscience*  
*Journal of Neuroscience Methods*  
*Journal of Physiology* (London)  
*Neuroscience*  
*Neuroscience Letters*  
*Pediatric Research*  
*Respiration Physiology*  
*Science*

Grant reviewer for:

*American Heart Association; National Institutes of Health; National Science Foundation; The Wellcome Trust; United States Civilian Research and Development Foundation; Veterans Administration, Biotechnology and Biological Sciences Research Council, UK; Canada Foundation for Innovation.*

Service since 2003 -

NSF review panel CRCNS-2 for the joint NSF-NIH Collaborative Research in Computational Neuroscience Program ( 2003-2004)

NIH Special Emphasis Panel ZRG1 MDCN-C Neuro-Bioengineering (Chair) ( 2003-2004)

NIH Special Emphasis Panel ZRG1 IFCN-E Respiration ( 2003-2004)

NIH Special Emphasis Panel ZRG1 RES-D (03) ( 2003-2004)

NIH Special Emphasis Panel ZRG1 MDCN-G July 27, 2004

NIH Special Emphasis Panel ZRG1 MDCN-C Neuro-Bioengineering (Chair) August 10, 2004

NIH Special Emphasis Panel ZRG1 MDCN-C Neural-Engineering (Chair) March 14, 2005

NIH Special Emphasis Panel ZRG1 MDCN-K Neurotech/Engineering (Chair) July 27, 2005

NSF review panel CRCNS, March 2-3, 2006.

Biotechnology and Biological Sciences Research Council David Phillips Fellowship, U.K., 2011

Editorial Boards:

NSF grant reviewer 2007, 2012

*Journal of Neurophysiology* (July, 2014 – present)

NIH Sensorimotor Integration Study Section (*ad hoc* 2005, 2007, 2013; regular member, 2007-2012.

NIH Special Emphasis Panel ZGM1-TWD-6(SC) National Institute of General Medical Sciences, November 15, 2013

*APSselect* (July, 2018 – present)

NIH Special Emphasis Panel/Scientific Review Group 2014/10 ZRG1 IFCN-T (02) M June 10-11, 2014

NIH Respiratory Integrative Biology and Translational Research: RIBT study section June 26-27, 2014

2001-2003 Financial Management Information Services Sponsors Group  
2001-2003 Research Council, ex officio  
2001-2003 Research Incentives Subcommittee  
2001-2003 Faculty Salaries on Grants Subcommittee  
2001-2003 Radiation Safety Committee, ex officio  
2001-2003 Biosafety Committee, ex officio  
2003-2004 President's Advisory Committee for the Search for the Vice-President for Health Sciences and  
Dean of Medicine  
2004-2006 Advisory Board, NSF IGERT (Integrative Graduate Education Research and Training) Program at  
USF

2004-2006	USF College of Engineering Advisory Board
2004	<i>Ad hoc</i> discipline committee for Distinguished University Professor nominees
2005- 2007	Faculty Liaison for the USF Board of Trustees Workgroup on Health Sciences.
2006	Search committee for new College of Engineering Associate Dean for Research
2011	Reviewer for Internal Research Assistant Professor Awards Program – USF Office of Research
2015	Biomedical Engineering Initiative Working Group

*USF College of Medicine Service*

1985-1986	Vice-president, College of Medicine Faculty Association
1986-1987	President, College of Medicine Faculty Association
1977-1985	Electron Microscope Committee
1979-1980	Faculty Seminar Committee
1979-1980	Third and Fourth Year Curriculum Subcommittee
1980-1981	Learning Resources Committee
1980-1985	Computer Council
1981-1983	Rules, Policies, Procedures
1982-1983	Safety Committee
1988-1990	Committee for Institutional Grant Administration
1988-1990	Committee for Capital Expenditure Recommendations
1988	Committee to Draft College of Medicine Bylaws
1988	Task Force on Faculty Development
1988	Chair of Faculty Development Section, Faculty Retreat
1990	Search Committee, Neurophysiology position in Surgery
1990	Committee on Graduate Medical Sciences Education and Graduate Affairs
1991	Task Force on Faculty Development
1991	Task Force on Research
1991	Task Force on Graduate Education
1992	Ad Hoc Committee on Development of Neuroscience Course
1992-	Executive Council
1993	Ad hoc committee on Attitudes and Principles of Conduct for Faculty and Students
1993-1995	Curriculum Committee
1994	Participant in Curriculum Retreat
1994-1995	Dean's Implementation Committee on Curriculum Reform
1996-1997	Strategic Planning Committee, College of Medicine
1997- 2000	Committee on Space, College of Medicine
1997	Workgroup for Clinical Investigator/Basic Science Pathway for Subspecialty Residents
1997	Search Committee for American Heart Association Professorship in Surgery
1998	Member of LCME Committee I: Objectives
1997	Elected representative of Basic Science Chairs on LCME Overview Committee
1998-2000	Chair, Neuroscience Concentration Committee
1998-2001	Chair, Committee on Space, College of Medicine
1997	Chair, Year 4 Curriculum Work Group
2000	Search Committee, Chair of Pediatrics
2002-2003	Search Committee, Chair of Neurology
2003-2004	Chair, Neuroscience Research Work Group
2003-2004	Chair, COM Administrative Efficiencies Steering Committee
2004-2005	Chair, Search Advisory Committee for Assoc. V. P. and Vice-Dean for Research, HSC
2004-2005	Research Strategic Workgroup

2004-2005 Financial Management Strategic Workgroup  
2004-2005 Faculty Development Strategic Workgroup  
2004-2005 HSC Cardiovascular Initiative Workgroup  
2005 M.D. - Ph.D. Program Implementation Workgroup  
2005-2007 Co- Chair AIMS Council  
2005-2006 Chair LCME Committee Two: Research/Graduate Programs/Basic Science  
2006 Dean's Strategic Advisory Committee  
2006-2007 Member, Search Committee for Rothman Endowed Chair in Pediatrics  
2006-2007 COM Research Bridge Funding Committee  
2006-2008 Leadership Development Advisory Council  
2006-2008 Mentor, the Leadership Institute at USF Health  
2006-2007 College of Medicine Space Committee  
2007-2008 Search Advisory Committee for Vice-Dean for Education  
2007-2009 Chair, College of Medicine Financial Oversight Committee  
2012- Department of Molecular Pharmacology and Physiology Faculty Development Committee  
2013- Department of Molecular Pharmacology and Physiology Executive Committee

*USF Health Service*

2002-2003 Health Sciences Center Conflict of Interest Task Group  
2003-2004 Chair, Professional Integrity Advisory Council, Health Sciences Center  
2004-2005 Health Sciences Center Conflict of Interest Committee
