

USF Morsani College of Medicine
School of Physical Therapy & Rehabilitation Sciences
 DPT Master Textbook List

The School recognizes that each DPT student should have the appropriate tools/equipment to allow for professional preparation in the didactic, as well as clinical aspects of the program. To meet this need, each DPT student will purchase a Student Equipment Kit upon matriculation into the program. The justification for purchasing this kit is that it includes tools/equipment that a physical therapist uses in clinical practice and enables the student to have access to equipment at all times, e.g., class/lab activities, clinical mentoring experiences, and independent practice. Prior to purchasing the kit, students may opt out of purchasing a stethoscope if their stethoscope meets the program's criteria and is approved by the program.
