About Dermatology

Specializing in the diagnosis and treatment of common and rare skin disorders in patients of all ages, the USF Department of Dermatology and Cutaneous Surgery is staffed by dermatologists certified by the American Board of Dermatology who are experts in the assessment and treatment of skin cancer, melanoma and lymphoma, as well as skin aging, psoriasis and eczema. The Department has faculty that specialize in Mohs micrographic surgery, an advanced tissue-sparing procedure for skin cancer removal.

Our comprehensive skin health practice also features the USF Health Cosmetic and Laser Center at Davis Islands in South Tampa, the area's finest all-inclusive skin treatment center, with state-of-the art FX lasers for total skin rejuvenation and services including Botox, dermal fillers, laser hair removal and vein therapy. Just call 813-259-8694 for appointments or visit www.usfcosmetics.com for more information.

Features

Photo Therapy Unit

PUVA and Narrow Band Photo Light Therapy are used for the treatment of various skin diseases and disorders such as psoriasis, eczema, itching and hard to treat atopic dermatitis. The benefits to photo light therapy is the improvement of existing lesions, reduction of new lesions, and in some cases a near total clearing of the disease process. USF Health Dermatology is proud to be one of the few to have this technology in the Tampa area.

Mohs Surgery

Mohs micrographic surgery is a specialized, highly effective method for the complete removal of skin cancer. This procedure is named in honor of Dr. Frederic Mohs who created the technique. Mohs surgery differs from other skin cancer treatments in that it permits the comprehensive microscopic examination and mapping of the removed tissue to ensure complete removal of all cancerous cells.

Cosmetic Dermatology

Our Cosmetic and Laser Center on Davis Islands is Cosmetic Dermatology's best kept secret. This location offers all of the latest cosmetic procedures from Botox and Fillers to Laser Skin Rejuvenation and Laser Vein Therapy. Dermatology and Cosmetics all under one roof. For more information please visit www.usfcosmetics.com or call 813-259-8694

Dermatology for Skin of Color

Skin diseases are very common in people of color. Some can be minor but others can cause considerable distress, embarrassment, and frustration when seeking care. Skin of color is unique and skin disease in skin of color can present challenges for the patient and health care provider.

Stay Informed

By signing up to receive our emails you will be in touch and informed on the latest information and promotions available. Community events on Aging, Skincare and Skin Cancer are just a few of the things that are happening at USF Health Dermatology and Cutaneous Surgery and USF Health Cosmetic and Laser Center.
