

OCR Clinical Services Price List

Clinical Services Fees

Research nurse, study coordinator, and regulatory coordinator services are available on a limited fee for hire basis for clinical research studies being conducted in the Clinical Research Center in the Morsani building and certain additional locations. Study teams will indicate on the [New Study Questionnaire](#) if clinical services are being requested for the trial. In addition, a [Service Request Form](#) will be completed by the study team to inform the scope of services being requested and assist in estimating the cost of services to be charged against the study account for budget development purposes.

Study accounts are invoiced for actual work performed toward the trial at an hourly rate for most nursing and study coordination services. New studies are accepted on a first come first served basis dependent on staff availability and skill set requirements of the study.

Role	Hourly Fee*
Nursing Services	\$75
Study Coordination	\$50
Data Management	\$40
Service	Flat Rate Fee*
Regulatory Coordination – Initial through Close	\$3000
Regulatory Coordination – Initial Submission only	negotiable

*Overhead of 9% applied to all fees

For inquiries about alternative pricing structures such as dedicated percentage of salary support please contact the OCR directly at OCR@health.usf.edu.
