Course Description

One of the greatest challenges for the practicing urologist is staying abreast of the latest advances in the field. This course is designed for practicing urologists who are interested in updating their knowledge in the diagnosis, evaluation and management of urologic problems. Distinguished faculty will present advances in the management of urological disease; including sexual function, uro-oncology, laparoendoscopic single-site surgery, robotic and reconstruction surgery with a strong emphasis on the technical aspects of various urological procedures. There will be ample time for questions and answers.

Objectives *Upon completion of this program, participants should be able to:*

- **Summarize** strategies to implement quality improvement and patient safety in Urology.
- **Analyze** the best approach for renal decompression for infected calculus.
- **Summarize** the optimal management of medium-sized renal stones including medical management of nephrolithiasis.
- **Describe** evidence-based management of reconstructive urology patients.
- **Describe** the role of prostate cancer vaccines.
- **Determine** the role of radical prostatectomy for high risk disease and guidelines for prostate cancer screening.
- **Compare** and **contrast** surgery treatment options in urinary diversion vs. cutaneous ureterostomy.
- **Optimize** treatments for bladder neck contracture following radical prostatectomy.
- **Identify** the role of cosmetic urology.
- **Describe** how to prevent and manage complications of partial nephrectomy.
- **Summarize** controversies in Testosterone Therapy.
- **Identify** current clinical management of Orchalgia.
- **Recognize** the role of neoadjuvant and adjuvant chemotherapy for muscle invasive bladder cancer.
- **Analyze** the use of endourological management of upper tract urothelial carcinoma.
- **Discuss** intravesical therapies for non-muscle invasive bladder cancer.
- **Describe** how to best evaluate and manage adrenal masses.
