General Cardiovascular Disease Fellowship:

We have six positions available for General Cardiovascular Disease Fellowship training. Applicants must be completing or have completed an ACGME accredited fellowship in Internal Medicine. The Cardiovascular Disease fellowship is of three years duration beginning July 1st of each academic year. Please note the only type of visa our institution can sponsor is a J1 visa. All applications must go through ERAS. Mailed or emailed applications will be discarded.

Application and Contact Information:

Please submit the following via ERAS:
- Common Application Form
- Personal Goals Statement
- 3 Letters of Recommendation (1 from Current Program Director)
- USMLE Transcripts
- ECFMG Status Report (Foreign Medical Graduates only)
- Wallet-size color photo

Applications are accepted through Electronic Resident Application System (ERAS) at:
https://www.aamc.org/students/medstudents/eras/

Interventional Cardiology Fellowship:

We have two positions for 4th year Interventional Cardiology Fellowship training. Applicants must be completing or have completed an ACGME accredited fellowship in Cardiovascular Disease. The Interventional fellowship is of one year’s duration beginning July 1st of each academic year. Training includes cardiac interventional procedures, some peripheral vascular procedures, interventional cardiology consultation, and interventional research. Upon completion of the program, fellows are eligible to take the American Board of Medicine (ABIM) board examination in Interventional Cardiology. Applicants must submit our completed application form, attach curriculum vitae, personal statement, USMLE scores, three letters of recommendation, (1 from your current Program Director), and color photo. Incomplete applications will not be considered.
Clinical Cardiac Electrophysiology Fellowship:

We have one position for 4th year Clinical Cardiac Electrophysiology Fellowship training. Applicants must be completing or have completed an ACGME accredited fellowship in Cardiovascular Disease. The Electrophysiology fellowship is of one year’s duration beginning July 1st of each academic year. Training will include all aspects of complex ablation, device therapy, arrhythmia consultation, and electrophysiology research. Upon completion of the program, fellows are eligible to take the American Board of Medicine (ABIM) board examination in Electrophysiology. Applicants must submit our completed application form, attach curriculum vitae, personal statement, USMLE scores, three letters of recommendation, (1 from your current Program Director), and color photo. Incomplete applications will not be considered.

Advanced Cardiac Imaging Fellowship:

We have one position for 4th year Advanced Cardiac Imaging Fellowship training. Applicants must be completing or have completed an ACGME accredited fellowship in Cardiovascular Disease. The Advanced Cardiac Imaging Fellowship is of one year’s duration beginning July 1st of each academic year. Training will include a curriculum designed to allow trainees to achieve Level 3 competence for Advanced Training in Cardiovascular PET/CT/MRI, Advanced Radionuclide Imaging, and Advanced Echo as outlined in the American College of Cardiology COCAT Guidelines. This fellowship can be tailored to meet individual interests of the fellow. Applicants must submit our completed application form, attach curriculum vitae, personal statement, USMLE scores, three letters of recommendation, (1 from your current Program Director), and color photo. Incomplete applications will not be considered.
