This document pertains to fellow rotations at USF affiliate hospitals. This program is part of the fellowship training program in the College of Medicine, Division of Allergy and Immunology at the University of South Florida. All ACGME and JCAHO guidelines pertaining to graduate medical education apply to this rotation.

In keeping with ACGME and JCAHO guidelines, the faculty and program director are responsible for providing fellows with direct experience in progressive responsibility for patient management. All patient care at TGH provided by fellows will be provided under direct or indirect faculty supervision. Supervision must be documented in the medical record in accordance with the College of Medicine, Division of Allergy and Immunology at the University of South Florida compliance guidelines.

Activities performed **without direct supervision** require access to the supervisory physician for communication and physical access **within 30 minutes**. Activities performed with direct supervision require presence of the supervisory physician. Residents are authorized to perform any activity assigned while under direct supervision. Final interpretation of all diagnostic and therapeutic studies requires direct supervision. Fellows at each postgraduate year of training, while not limited to the following activities, are specifically allowed to do these without direct supervision. This document may be modified by the program director based on additions to the training program.

1) Location of hospital(s) that rotations are taking place at:
   a) James A. Haley Veteran’s Hospital
   b) University of South Florida College of Medicine
   c) All Children’s Hospital
   d) Tampa General Hospital
   e) H. Lee Moffitt Cancer Center

**PGY 1**

**WITHOUT Direct Supervision**

Residents Shall:
Follow up on inpatient hospital consults and report to the attending physician upon completion of the consult.
Resident's Shall:

1) Do pertinent history and physical examination and develop diagnostic and therapeutic plans for patients seen in USF affiliated outpatient clinics.

2) Provide ongoing care for clinic patients and inpatient hospital consults.

3) Learn proper techniques for performing
   a) Prick-puncture skin testing
   b) Intradermal testing
   c) Patch testing
   d) Rhinoscopy
   e) Spirometry
   f) Peak flow determination
   g) Allergen immunotherapy
   h) Drug desensitization
   i) IVIgG infusions
   j) Skin Biopsies
   k) Immunodeficiency laboratory evaluation
   l) Management of anaphylaxis

4) Recognize and provide proper management/care for patients seen in all USF affiliated outpatient clinics and inpatient hospital consults.

5) Provide consults to physicians in other specialties regarding allergy/immunology related problems of their patients.

6) Assure ordering of proper dose of medication(s) for allergic/immunologic problems of patients seen in all USF affiliated outpatient clinics and inpatient hospital consults.

7) Discuss diagnosis, prognosis, diagnostic testing, therapeutic considerations and alternatives, support care, end-of-life issues, and psychosocial issues with patients who have allergic/immunologic disorders.

8) Prepare informal and formal educational seminars for residents, subspecialty fellows and faculty on allergy/immunology topics.

9) Develop a plan for a research project.
PGY 2
WITHOUT Direct Supervision

Follow up on inpatient hospital consults and report to the attending physician upon completion of the consult.

PGY 2
WITH Direct Supervision

Residents Shall:
1) Do pertinent history and physical examination and develop diagnostic and therapeutic plans for patients seen in USF affiliated outpatient clinics.

2) Provide ongoing care for clinic patients and inpatient hospital consults.

3) Learn proper techniques for performing:
   a) Prick-puncture skin testing
   b) Intradermal testing
   c) Patch testing
   d) Rhinoscopy
   e) Spirometry
   f) Peak flow determination
   g) Allergen immunotherapy
   h) Drug desensitization
   i) IVIgG infusions
   j) Skin Biopsies
   k) Immunodeficiency laboratory evaluation
   l) Management of anaphylaxis

4) Recognize and provide proper management/care for all patients seen in USF affiliated outpatient clinics and inpatient hospital consults.

5) Provide consults to physicians in other specialties regarding allergy/immunology related problems of their patients.

6) Assure ordering of proper dose of medication(s) for allergic/immunologic problems of patients seen in all USF affiliated outpatient clinics and inpatient hospital consults.

7) Discuss diagnosis, prognosis, diagnostic testing, therapeutic considerations and alternatives, support care, end-of-life issues, and psychosocial issues with patients who have allergic/immunologic disorders.

8) Prepare informal and formal educational seminars for residents, subspecialty fellows and faculty on allergy/immunology topics.

9) Develop a plan for a research project.
