

SCOPE OF PRACTICE AND SUPERVISION POLICY

**University of South Florida Orthopaedics MSK
Oncology Fellowship**

**Director of Program: Odion Binitie, MD USF
Health Morsani College of Medicine**

University of South Florida

This document pertains to Resident PGY6 rotations under the auspices of the University of South Florida Orthopaedics MSK Oncology Fellowship at Moffitt Cancer Center and All Children's Hospital. All Accreditation Council of Graduate Medical Education (ACGME), Joint Commission (JC), Agency for Health Care Administration (AHCA), and CMS guidelines pertaining to graduate medical education apply to this scope of practice.

The purpose of this policy is to ensure that residents are provided adequate and appropriate levels of supervision during the course of the educational training experience and to ensure that patient care continues to be delivered in a safe manner. The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each resident is assigned by the program director and faculty members to ensure effective oversight of resident supervision.

Each resident and faculty must inform each patient of their respective roles in patient care. Residents must know the limits of his/her scope of authority and the circumstances under which he/she is permitted to act with conditional independence. Residents must communicate with the supervising faculty; required scenarios include escalation of care, postoperative or unexpected complications, emergency care, patient upgrade to higher level of care, event report, patient or staff request, patient death or if the resident is harmed or threatened. All patient care must be provided under a credentialed and privileged attending physician. The attending physician is ultimately responsible for management of the individual patients and the supervision of the residents involved in the care of the patient. Supervision must be documented in the medical record in accordance with the MSK Oncology at the University of South Florida compliance guidelines.

Residents and faculty can report concerns regarding inadequate supervision on the GME website or the hospital reporting system. Any reports will be protected from reprisal. This document is available on the GME website for all residents, faculty, other team members, and patients.

The program follows the ACGME classification of supervision as noted below. The supervising physician is a faculty member. These supervisory levels are used throughout the Scope of Practice document.

Direct Supervision

- 1) The supervising physician is physically present with the Resident during the key portions of the patient interaction and the critical portions of the procedure.

Indirect Supervision

- 1) The supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the Resident for guidance and is available to provide appropriate direct supervision.

Oversight

- 1) The supervising physician is available to provide review of procedures/encounters with feedback after care is delivered.

The fellowship program has a curriculum for providing knowledge and performance competence that includes surgical training, simulation, lectures, tumor board, journal club pre- and postoperative conferences. Annual decisions about competence are made by the program's clinical competency committee to ensure successful progression and completion of the fellowship. All residents need to maintain current ACLS training.

	Supervising Physician present (Direct)	Supervising Physician is not providing physical or concurrent visual or audio supervision but is immediately available	Supervising physician is available to provide a review of procedures/encounters with feedback after care is delivered	
Designated Levels	1	2	3	
Spine/ Pelvis				PGY-6
22112 - Partial excision of vertebral body, for intrinsic bony lesion, without decompression of spinal cord or nerve root(s), single vertebral segment; thoracic				1
22114 – Partial excision of vertebral body, for intrinsic bony lesion, without decompression of spinal cord or nerve root(s), single vertebral segment; lumbar				1
22101 – Partial excision of posterior vertebral component (e.g., spinous process, lamina or facet) for intrinsic bony lesion, single vertebral segment; thoracic				1

	Supervising Physician present (Direct)	Supervising Physician is not providing physical or concurrent visual or audio supervision but is immediately available	Supervising physician is available to provide a review of procedures/encounters with feedback after care is delivered	
Designated Levels	1	2	3	
22102 – Partial excision of posterior vertebral component (e.g., spinous process, lamina or facet) for intrinsic bony lesion, single vertebral segment; lumbar				1
27075 – Radical resection of tumor; wing of ilium, 1 pubic or ischial ramus or symphysis pubis				1
27076 – Radical resection of tumor; ilium, including acetabulum, both pubic rami, or ischium and acetabulum				1
27077 – Radical resection of tumor; innominate bone, total				1
27078 – Radical resection of tumor; ischial tuberosity and greater trochanter of femur				
SOFT TISSUE RESECTIONS AND RECONSTRUCTION				PGY 6
21936 - Radical resection of tumor (e.g., sarcoma), soft tissue of back or flank; 5 cm or greater				1
22905 - Radical resection of tumor (e.g., sarcoma), soft tissue of abdominal wall; 5 cm or greater				1
23078 - Radical resection of tumor (e.g., sarcoma), soft tissue of shoulder area; 5cm or greater				1
24079 - Radical resection of tumor (e.g., sarcoma), soft tissue of upper arm or elbow area; 5 cm or greater				1
25078 - Radical resection of tumor (e.g., sarcoma), soft tissue of forearm and/or wrist area; 3 cm or greater				1
27059 - Radical resection of tumor (e.g., sarcoma), soft tissue of pelvis and hip area; 5 cm or greater				1

	Supervising Physician present (Direct)	Supervising Physician is not providing physical or concurrent visual or audio supervision but is immediately available	Supervising physician is available to provide a review of procedures/encounters with feedback after care is delivered	
Designated Levels	1	2	3	
27364 - Radical resection of tumor (e.g., sarcoma), soft tissue of thigh or knee area; 5 cm or greater				1
27616- Radical resection of tumor (e.g., sarcoma), soft tissue of leg or ankle area; 5 cm or greater				1
LIMB SALVAGE				<i>PGY 6</i>
23210 - Radical resection of tumor; scapula				1
23220 - Radical resection of tumor, proximal humerus				1
24150 - Radical resection of tumor, shaft or distal humerus				1
25170 - Radical resection of tumor, radius or ulna				1
27365 - Radical resection of tumor, femur or knee				1
27645 - Radical resection of tumor; tibia				1
27646 - Radical resection of tumor; fibula				1
SURGICAL MANAGEMENT OF COMPLICATIONS - MINIMUM 5				
15736 - Muscle, myocutaneous, or fasciocutaneous flap; upper extremity				1
15738 - Muscle, myocutaneous, or fasciocutaneous flap; lower extremity				1

	Supervising Physician present (Direct)	Supervising Physician is not providing physical or concurrent visual or audio supervision but is immediately available	Supervising physician is available to provide a review of procedures/encounters with feedback after care is delivered	
Designated Levels	1	2	3	
23334 - Removal of prosthesis, includes debridement and synovectomy when performed; humeral or glenoid component				1
24435 - Repair of nonunion or malunion, humerus; with iliac or other autograft (includes obtaining graft)				1
27091 - Removal of hip prosthesis; complicated, including total hip prosthesis, methylmethacrylate with or without insertion of spacer				1
27488 - Removal of prosthesis, including total knee prosthesis, methylmethacrylate with or without insertion of spacer, knee				1
24515 - Open treatment of humeral shaft fracture with plate/screws, with or without cerclage				1
27506 - Open treatment of femoral shaft fracture, with or without external fixation, with insertion of intramedullary implant, with or without cerclage and/or locking screws				1
27472 - Repair, nonunion or malunion, femur, distal to head and neck; with iliac or other autogenous bone graft (includes obtaining graft)				1
27724 - Repair of nonunion or malunion, tibia; with iliac or other autograft (includes obtaining graft)				1
MANAGEMENT OF METASTATIC DISEASE - MINIMUM 20				PGY 6

	Supervising Physician present (Direct)	Supervising Physician is not providing physical or concurrent visual or audio supervision but is immediately available	Supervising physician is available to provide a review of procedures/encounters with feedback after care is delivered	
Designated Levels	1	2	3	
23491 - Operative Procedures Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate; proximal humerus				1
24498 - Prophylactic treatment (nailing, pinning, plating or wiring), with or without methylmethacrylate, humeral shaft				1
27187 - Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate, femoral neck and proximal femur				1
27125 - Hemiarthroplasty, hip, partial (e.g., femoral stem prosthesis, bipolar arthroplasty)				1
27130 - Arthroplasty, acetabular and proximal femoral prosthetic replacement (total hip arthroplasty), with or without autograft or allograft				1
27244 - Treatment of intertrochanteric, peritrochanteric, or subtrochanteric femoral fracture; with plate/screw type implant, with or without cerclage				1
27245 - Open treatment of intertrochanteric, peritrochanteric, or subtrochanteric femoral fracture; with intramedullary implant, with or without interlocking screws and/or cerclage				1
27447 - Arthroplasty, knee, condyle and plateau; medial AN lateral compartments with or without patella resurfacing (total knee arthroplasty)				1
27495 - Prophylactic treatment (nailing, pinning, plating, or wiring) with or without methylmethacrylate, femur				1
27511 - Open treatment of femoral supracondylar or				1

	Supervising Physician present (Direct)	Supervising Physician is not providing physical or concurrent visual or audio supervision but is immediately available	Supervising physician is available to provide a review of procedures/encounters with feedback after care is delivered	
Designated Levels	1	2	3	
transcondylar fracture without intercondylar extension, includes internal fixation, when performed				
27513 - Open treatment of femoral supracondylar or transcondylar fracture with intercondylar extension, includes internal fixation, when performed				1
27745 - Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate, tibia				1
