Pre-Implementation Phase Key Practices

1. Assure early multidisciplinary support by educating and identifying key champions in all pertinent departments.
2. Establish clear regular communication channels and processes, assuring that all necessary departments are represented.
3. Establish and test billing codes and processes to assure adequate and timely reimbursement.

Pre-Implementation Phase Key Practices (cont.)

4. Expand pharmacy capacity and device distribution to assure timely placement.
5. Educate clinicians, community partners and nurses about efficacy of pLARC within the full range of contraception, informed consent and shared decision making.
6. Educate clinicians, nurses and lactation consultants about the benefits and clinical recommendations related to pLARC placement and breastfeeding
