

Mother-Focused Care Initiative

MFC Initiative is An Important *First* Step to Addressing Health Care Differences

Potential Initiatives

-  Hypertension
- Hemorrhage
- Cesarean

Builds on the 3 Reasons for MFC

Global AIM: Improve maternal health by transforming hospital culture and environments to respectfully serve all mothers and their families, by helping them meet their needs.

MFC

Mother-Focused Care

Global AIM: Improve maternal health by transforming hospital culture and environments to respectfully serve all mothers and their families, by helping them meet their needs.

AIM

By 12/2024, each hospital will:

- 1) Achieve a 20% increase from baseline in the % of patients with a positive SDOH screen who were referred to appropriate services
- 2) Have 80% of providers and nurses attend an RMC training~ since January 2023

Global AIM: Improve maternal health by transforming hospital culture and environments to respectfully serve all mothers and their families, by helping them meet their needs.

By 12/2024, each hospital will:

- 1) Achieve a 20% increase from baseline in the % of patients with a positive SDOH screen who were referred to appropriate services
- 2) Have 80% of providers and nurses attend an RMC training~ since January 2023

Primary Key Drivers

Data Insights: maternal characteristics, risk factors, & outcomes across populations

Respectful Maternity Care (RMC)

Universal SDOH Screening & Linkage to Services/Resources

Family & Community Engagement in QI Work

Respectful care is a universal component of every driver & activity

Global AIM: Improve maternal health by transforming hospital culture and environments to respectfully serve all mothers and their families, and by helping them meet their needs.

Primary Key Driver

Data Insights

Learn about the mothers served: characteristics, risk factors, & outcomes across populations

Secondary Drivers

Improve the collection of individual patient characteristics

Use PQI & differences in perinatal outcomes dashboard to identify differences. Share findings, and build ongoing plans to address gaps

Respectful care is a universal component of every driver & activity

Global AIM: Improve maternal health by transforming hospital culture and environments to respectfully serve all mothers and their families, and by helping them meet their needs.

Primary Key Driver

Respectful Maternity Care (RMC)
Learn, define, commit, and implement respectful care for mothers and learn over time how well they are performing

Secondary Drivers

- Educate provider and staff about respectful maternity care and its components and strategies
- Develop a hospital commitment with providers and staff support
- Implement and use an ongoing respectful maternity care survey and other methods of maternal feedback to improve care

Respectful care is a universal component of every driver & activity

Global AIM: Improve maternal health by transforming hospital culture and environments to respectfully serve all mothers and their families, and by helping them meet their needs.

Primary Key Driver

Universal SDOH Screening and Linkage to Services/Resources
Screen all mothers for SDOH.
Assist & refer mothers to help meet needs in a successful and respectful way working with community partners

Secondary Drivers

Screen all mothers for SDOH using a standard process and format

Link patients to available services and resources for identified SDOH using a community resource directory and other referrals

Educate hospital staff on processes for developing a mutually agreed-upon plan of care utilizing a shared decision-making model

Respectful care is a universal component of every driver & activity

Global AIM: Improve maternal health by transforming hospital culture and environments to respectfully serve all mothers and their families, and by helping them meet their needs.

Primary Key Driver

Family & Community Engagement in Hospital QI Work
Include family and community representatives in defining and **implementing their hospital's QI initiative**

Secondary Drivers

Educate QI Team, leadership, providers and staff about family and community advisor involvement

Engage family and/or community advisors to provide ongoing input on QI efforts and care provision

Respectful care is a universal component of every driver & activity
