Maternal Opioid Recovery Effort (MORE)

Urgent Maternal Mortality Message for Providers from Florida PAMR: Overdoses are now the leading cause of pregnancy-associated death in Florida. Obstetric providers, nurses and hospitals are the first health care contact for most mothers with Opioid Use Disorder (OUD) and need to lead the effort to screen, assess, and refer these mothers for OUD treatment.

The rate of pregnant women diagnosed with opioid use disorder (OUD) during labor and delivery in the U.S. more than quadrupled from 1999 to 2014, according to a 2018 analysis by the Centers for Disease Control and Prevention (CDC). In Florida, the rate climbed from 0.5 per 1,000 delivery hospitalizations in 1999 to 6.6 in 2014.

This project's purpose is to work with providers, hospitals, and other stakeholders to improve identification, clinical care and coordinated treatment/support for pregnant women with opioid use disorder and their infants.

Project Focus: Standardization related to:

- OUD Screening
- Prevention
- Treatment
- Comprehensive Discharge Planning

Learn about our parallel infant health NAS Initiative.

MORE folder contents

- Clinical team side(left)
- 1. SBIRT pocket guide
- 2. Checklist
- 3. Provider Algorithm
- 4. Trauma-Informed Care
- 5. Narcan
- REMOVE above and place in chart as team reference
- Conduct Team Huddle when appropriate

- Patient side(right)
- 1. MORE HOPE pamphlet
- 2. Narcan tri-fold
- 3. Family Planning info

Give folder to patient, add information prn

MORE Folders & Huddles

- **MORE folders include:**
 - Patient care check list
 - Provider and patient education
- ☐ Team huddles at admission to coordinate care
- □ Pilot in 4 hospitals
- □ Creating prenatal versions
- ☐ Share with other hospitals
- ☐ Sent to all MORE teams

When an OB patient screens + for Opioid Use Disorder (OUD) during an admission, a MORE Folder (stored on L&D/Triage/MBU) is obtained by the patient's nurse.

Folder contents are listed below:

- (1) MORE OUD Clinical Algorithm for provider review
- (2) MORE Checklist/Workflow
- (3) Contraceptive Counseling materials
- (4) Community Mapping Tool to use with community referrals
- (5) Save a Life Naloxone (Narcan 8) guide to help providers complete Naloxone counseling / prescription
- (6) MORE patient education materials: MORE HOPE pamphlet & Naloxone tri-fold for the patient

The patient's nurse works with the rest of the OB clinical team to make sure the OUD Clinical Algorithm is followed & MORE Checklist is completed prior to discharge. Reminding the clinical team that OUD is the leading cause of maternal death in Florida may help the team understand why these steps matter. Remind all members of the care team that reducing stigma. & treating patients with empathy & compassion improves outcomes for moms with OUD.

ex tr	eating patients with empathy & compassion improves outcomes for mons with OOD.	
	MORE	Clinical Team
	Checklist/Workflow	Initials/Notes/Date
	Report + OUD screen to OB provider & give OB provider the MORE Clinical Algorithm to review	
	Request a neo/peds consult for positive OUD screen to counsel on NAS & how moms engage in opioid exposed newborn care when appropriate	
	Call Team Huddle-OB Provider, Neo/Peds, Social work, Charge Bedside RN during hospitalization	
	Confirm Hep C, Hep B, HIV and other recommended secondary screening completed	
	Confirm the provider has the Save a Life Naloxone guide (to assist with Naloxone counseling/prescription as a risk reduction strategy for all patients who use opioids regularly)	
	Handoff/Review MORE folder & MORE Checklist/Workflow with postpartum RN

Review this Checklist with OB Provider. Determine next steps for ANY incomplete elements.	
Confirm patient has early postpartum follow up visit with OB for 1-2 weeks PP scheduled.	
Ensure the OB clinical team is in communication with Neo/Peds to confirm a coordinated Plan of Safe Care (POSC). Make sure the patient / family understands their POSC.	
Ensure Alternatives to Opioids pamphlet has been provided if opioids prescribed.	

MORE HOPE: Helping Our Parents Excel

PROVIDER Education flyers

Ask Yourself: Am I Providing Trauma-Informed Care?

Trauma can result from:

- *Experiencing or witnessing violence/abuse
- Household substance use or mental health disorders
- *Racism
- *Anti-LGBTQ+ discrimination
- *Prior birth trauma
- . Powerty

Actionable Tips To Help Patients:

Feel SEEN

- *Unconditional positive regard
- «Eye contact
- *Acknowledge what you see

(e.g., "You look uncomfortable, how can I help?")

*Grounding in the present

Feel HEARD

- . Remind them that their voice matters
- Use trauma-informed language
- *Ask them how they would like to be supported (e.g., "Do you prefer distraction during the exam, or should I talk you through it step-by-step?")
- *Share trauma disclosures with team (with patient consent) so the patient does not need to retell or relive trauma

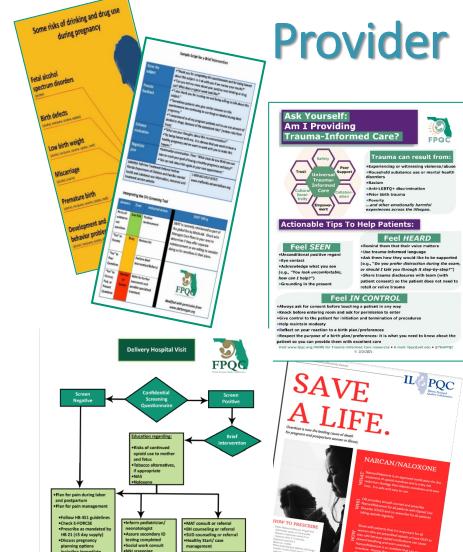

Feel IN CONTROL

- *Always ask for consent before touching a patient in any way
- Knock before entering room and ask for permission to enter
- . Give control to the patient for initiation and termination of procedures
- Help maintain modesty
- *Reflect on your reaction to a birth plan/preferences
- Respect the purpose of a birth plan/preferences: it is what you need to know about the patient so you can provide them with excellent care

Visit swwv.fpqc.org/NORE for Trauma-Informed Care resources • E-mail: fpqc@usf.edu • @TheFPQC V: 2/3/3/21

Community Collaborations

- Plans of Safe Care
- Resource Mapping

Community Collaborations: POSC

Focus on preventing substance use disorders before a woman becomes pregnant through promoting public awareness of the effects of substance use (including alcohol and tobacco) during pregnancy and encouraging access to appropriate substance use disorder treatment Focus on identifying substance use disorders among pregnant women through screening and assessment, engaging women into effective treatment services, and providing ongoing services to support recovery Focus on identifying and addressing the needs of infants affected by prenatal substance exposure, withdrawal symptoms, and Fetal Alcohol Spectrum Disorder including the immediate need for bonding and attachment with a safe, stable, consistent caregiver Focus on ensuring the infant's safety and responding to the needs of the infant, parent, and family through a comprehensive approach that ensures consistent access to a safe, stable caregiver and a supportive early care environment

Focus on identifying and responding to the unique developmental and service needs of the toddler, preschooler, child, and adolescent who was prenatally exposed through a comprehensive family-centered approach

Community Collaborations: POSC

- Purpose is to link moms, babies & families with services, as soon as SUD is identified.
- Components:
 - Mom's Behavioral Health Needs
 - Infant's Medical Care
 - Mom's Medical Care
 - Family/Caregiver Hx and Needs
- Whose leading efforts in your community?

Community Collaborations: Resource Mapping

- Work with local Healthy Start Coalitions to identify community resources, contacts
- Learn about CONNECT
- Get info about community initiatives
- Training for staff

Mindfulness & Stretching **Activities**

Photo credit: Jeffrey Westerhoff blue-tit-in-water-reflection

Mindfulness Activity: 4 Breaths

Breathe in for 4 slow counts...

Hold the breath for 4 slow counts...

Breathe out for 4 slow counts...

Wait 4 slow counts...

Repeat the cycle 4 times

Neck and Shoulder Stretch

- Slowly....
 - 1. Ear to shoulder
 - 2. Chin back, release
 - 3. Nod yes
 - 4. Side bends
 - 5. Look over shoulder
 - 6. Hold elbow over head
 - 7. Shrug shoulders
