Recognizing a Visionary Leader

“A leader takes people where they want to go. A great leader takes people where they don’t necessarily want to go, but ought to be.” *Rosalyn Carter*

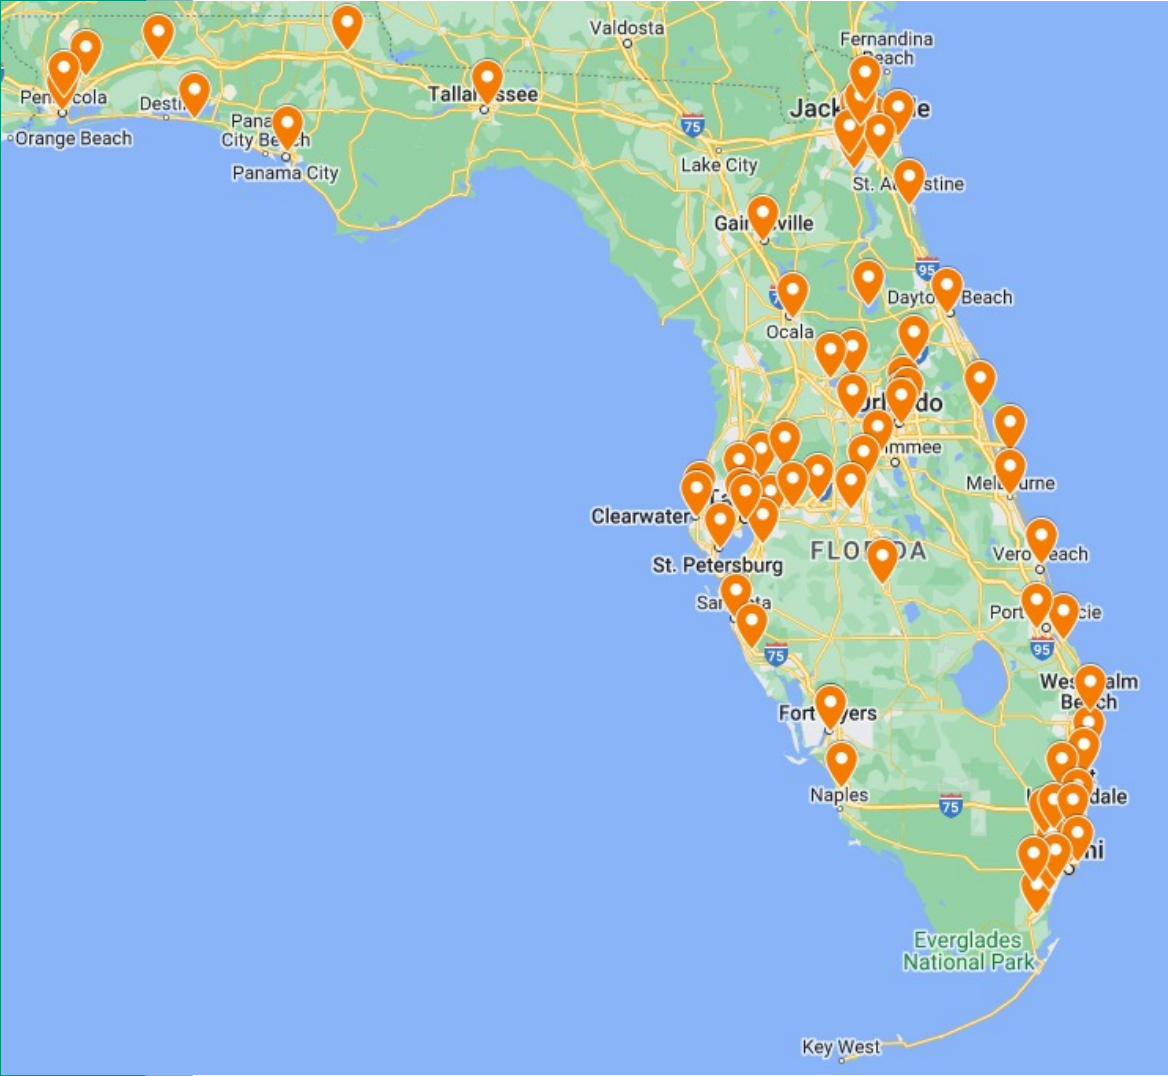

Florida's Postpartum Discharge Mortality Issue

- Florida & the US have the highest maternal mortality rates among developed countries.
- 35%-56% of pregnancy-related deaths occur after the mother has left the hospital after delivery.
- 75% of these deaths occur in the first 60 days after discharge.
- Two-thirds of these deaths are preventable; One-third are substantially preventable.
- Almost one-third of mothers have been seen in the ER and sent home before dying.

75 Florida Hospitals:

- 72% of maternity hospitals
- 82% of births

PACC
POSTPARTUM ACCESS & CONTINUITY OF CARE

Global AIM: Improve maternal health through hospital-facilitated continuum of postpartum care by coordinating and providing respectful, timely, and risk-appropriate coordinated care and services.

AIM

Primary Key Drivers

By 6/2024, FPQC participating hospitals will:

- Increase the % of patients with a 2-week PP visit scheduled prior to discharge by 20%*
- Increase patient PP education by 20%*

Process for Maternal Discharge Risk Screening & Arranging Early Postpartum Visits

Comprehensive Postpartum Patient Discharge Education

Clinician Postpartum Engagement and Education

Respectful care is a universal component of every driver & activity

PACC: New Strategies

- Expanded Coach-Mentor (CM) model led by RN Margie Boyer now with 16 CMs
- Added a CM QI training component led by Dr. Maya Balakrishnan – provides QI process training for CMs that they take back to their hospitals teams
- Implemented a new hospital recognition model with stars for achieving key success markers – up to 5 stars possible
- Increased participation in coaching calls: highest for any FPQC initiative to date

Multiple success stories related to:

- Educating mothers about post-birth warning signs prior to discharge
- Problems identified after implementing additional vital signs screening within two hours of discharge
- Health issues found and treated earlier due to 2-week PP visit

Hospital Postpartum Discharge Efforts

Hospitals with Implemented Process Flow to Schedule Early PP Visits

% Pts. with Scheduled Early PP Visits

ER education and engagement

- 30 hospitals have implemented verbal screening for pregnancy now and during the past year as part of the ER triage or initial assessment process (zero at baseline)
- 35 hospitals have implemented periodic education and engagement for ER physicians and staff about pregnancy and PP care including PP screening and care practices (3 at baseline)

FLORIDA PERINATAL QUALITY COLLABORATIVE

DON'T WAIT!

SCHEDULE YOUR 2 WEEK FOLLOW UP APPOINTMENT TODAY!

"SEE YOU IN  WEEKS!"

THE AVERAGE WOMAN WAITS UNTIL THE 6 WEEK POSTPARTUM CHECK TO REPORT SYMPTOMS OF PREECLAMPSIA TO THEIR DOCTOR. THAT'S 60,480 MINUTES WITHOUT TREATMENT.

STRIVING FOR ALL OF FLORIDA'S MOTHERS, INFANTS & FAMILIES TO HAVE THE BEST HEALTH OUTCOMES POSSIBLE THROUGH RECEIVING RESPECTFUL, EQUITABLE, HIGH QUALITY, EVIDENCE-BASED PERINATAL CARE.

Recognizing & Sharing Great Ideas

Baptist Health South Miami Hospital developed a great banner to support the 2-week post-partum discharge visit. They gave us permission to replicate the idea and we created these lovely buttons that you will be able to take home to your hospital teams today.
