

FPQC Pregnancy-Related Optimal Management of Hypertension (PROMPT)

Mid-Initiative Meeting: September 10, 2025

FPQC's Vision & Values

“All of Florida’s mothers, infants & families will have the best health outcomes possible through receiving respectful, high quality, evidence-based perinatal care.”

- Data-Driven
- Population-Based
- Evidence-Based
- Respect-Centered
- Value-Added

85% of FL maternity hospitals

91% of births in FL, 2023

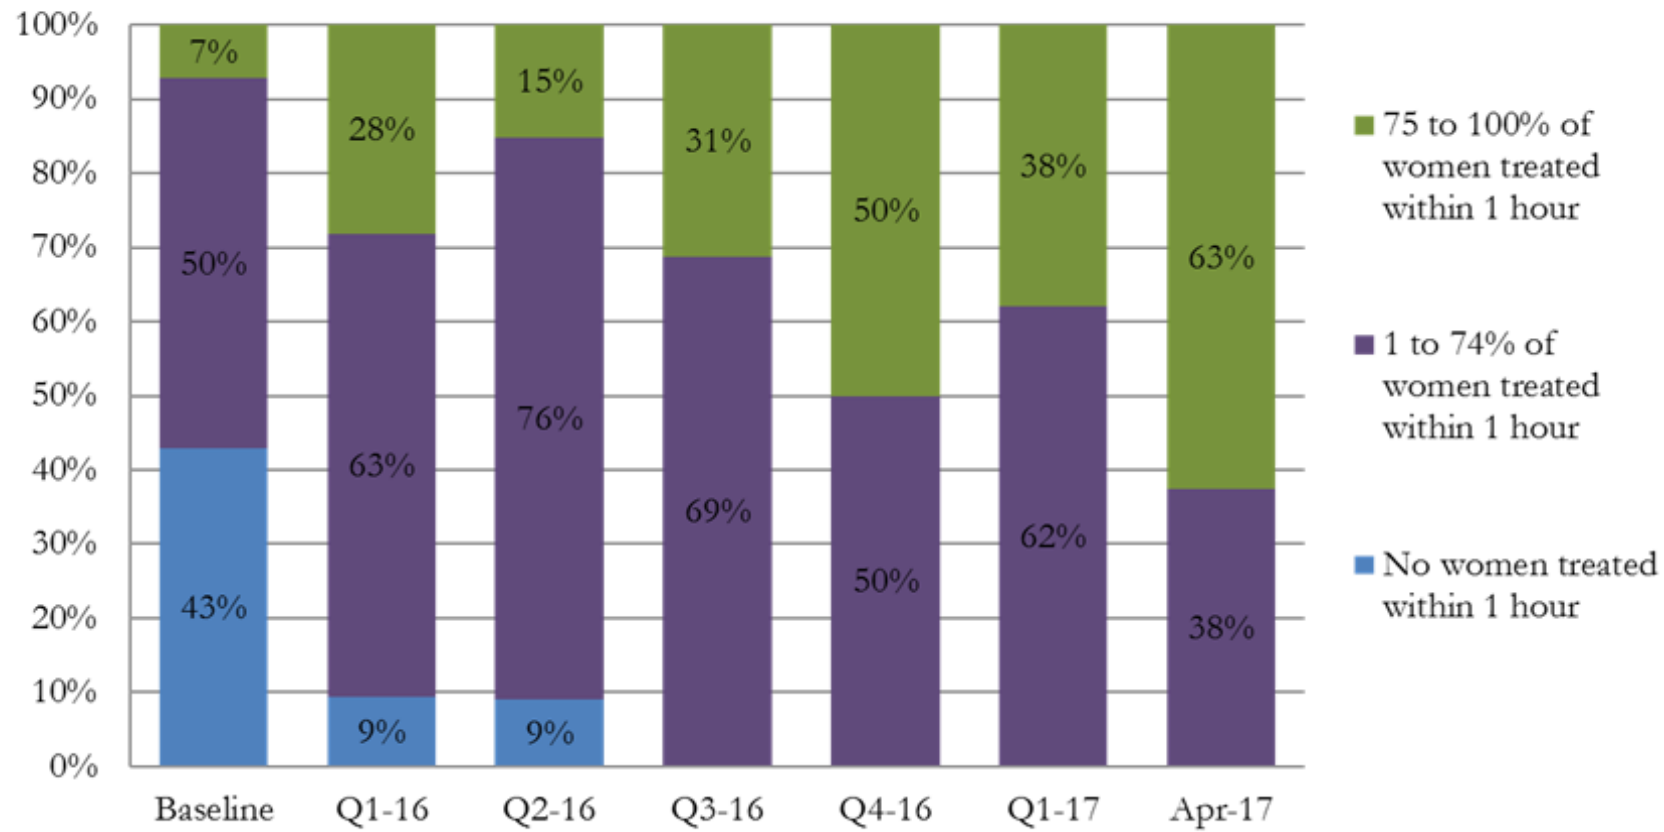

Yearly prevalence of HDP among delivery admissions

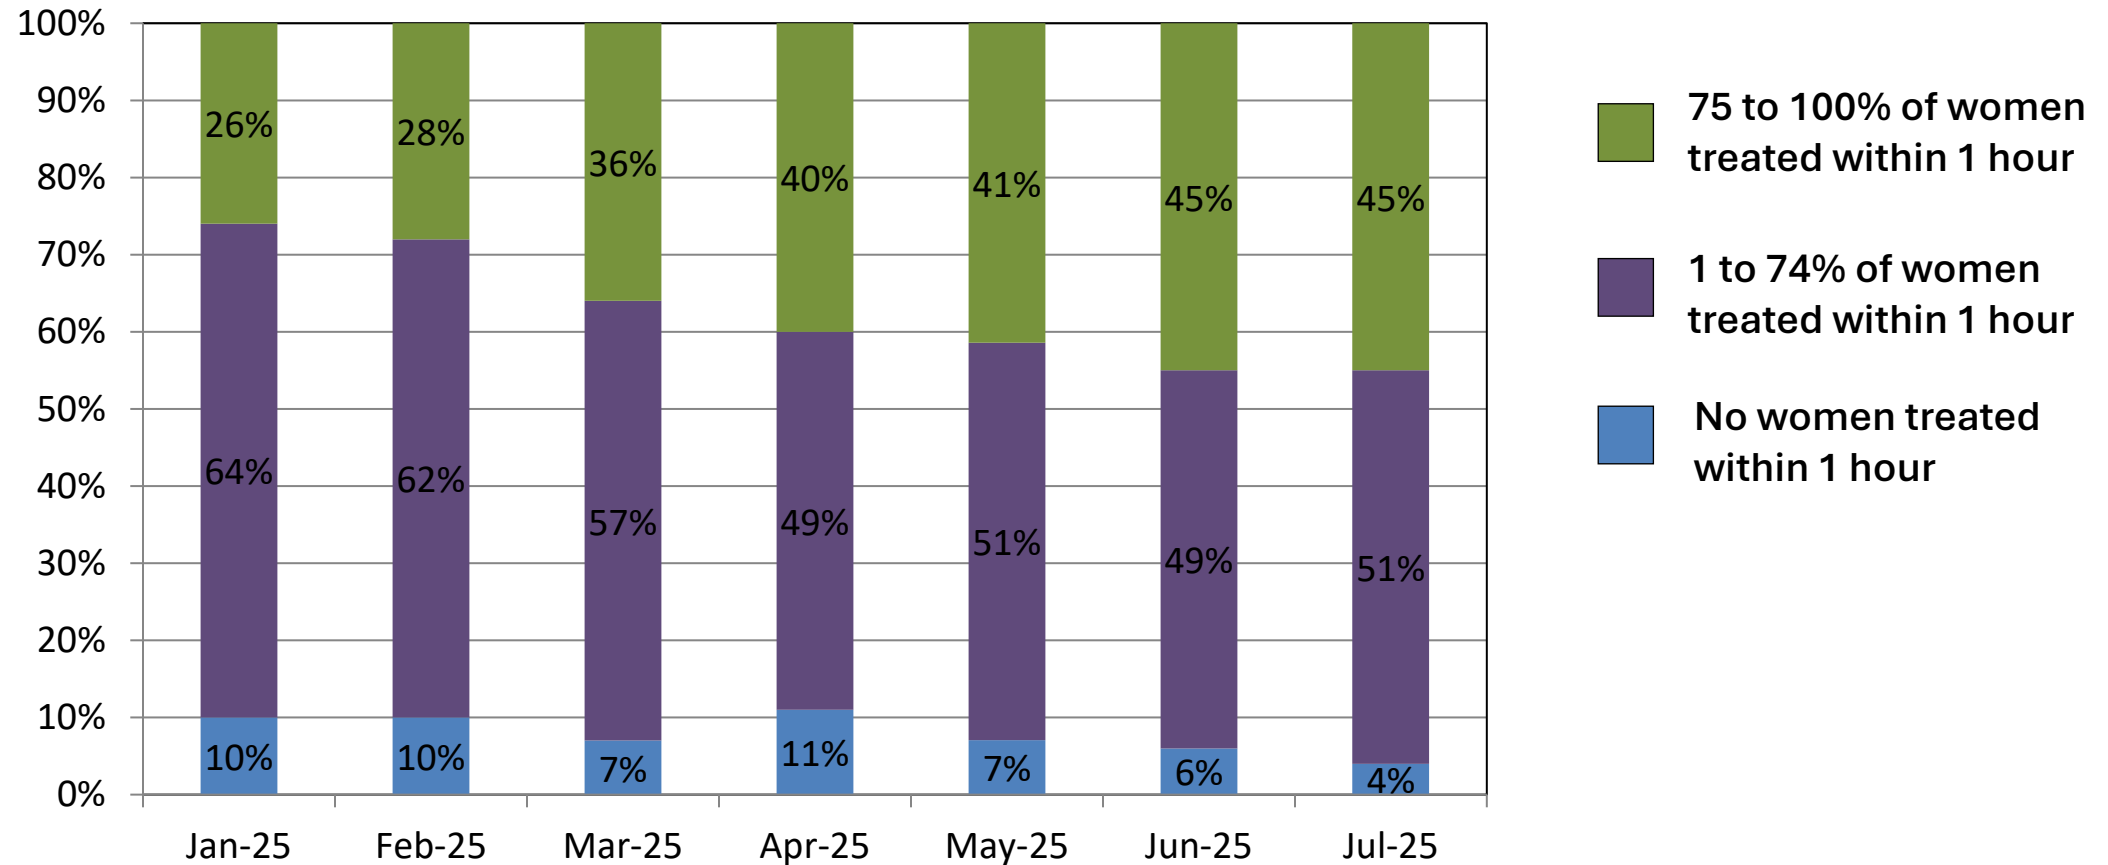

FPQC Hypertension in Pregnancy (HIP) 2015-2017

Percent Treated Within 1 hour with Persistent Severe Hypertension

FPQC Hypertension in Pregnancy –PROMPT

Percent Treated Within 1 hour with Persistent Severe Hypertension

Blood Pressure Cuffs

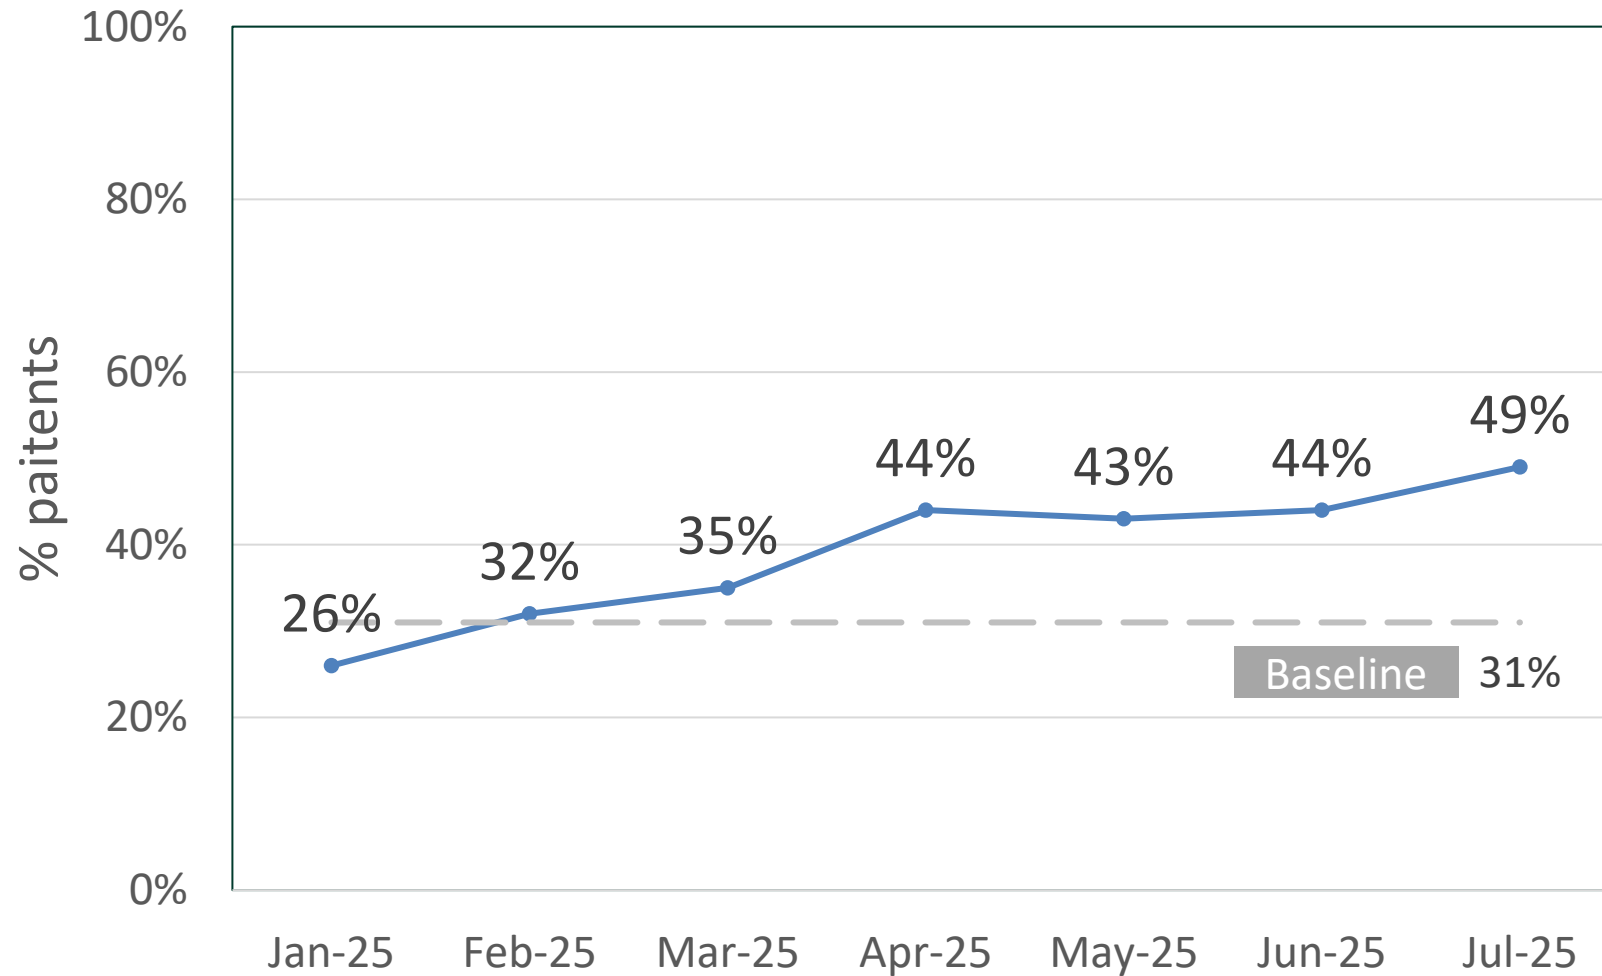

At the kickoff, FPQC distributed **5,000** wrist cuffs to 61 hospitals, along with new educational tools to teach patients how to use them.

Our goal was to help hospitals develop the practice of sending women with hypertensive disorders home with a cuff IN HAND.

According to our recent survey, 83% of PROMPT hospitals are distributing cuffs to some or all of their patients at discharge.

Today, we will be distributing another **3,400** cuffs to support these efforts.

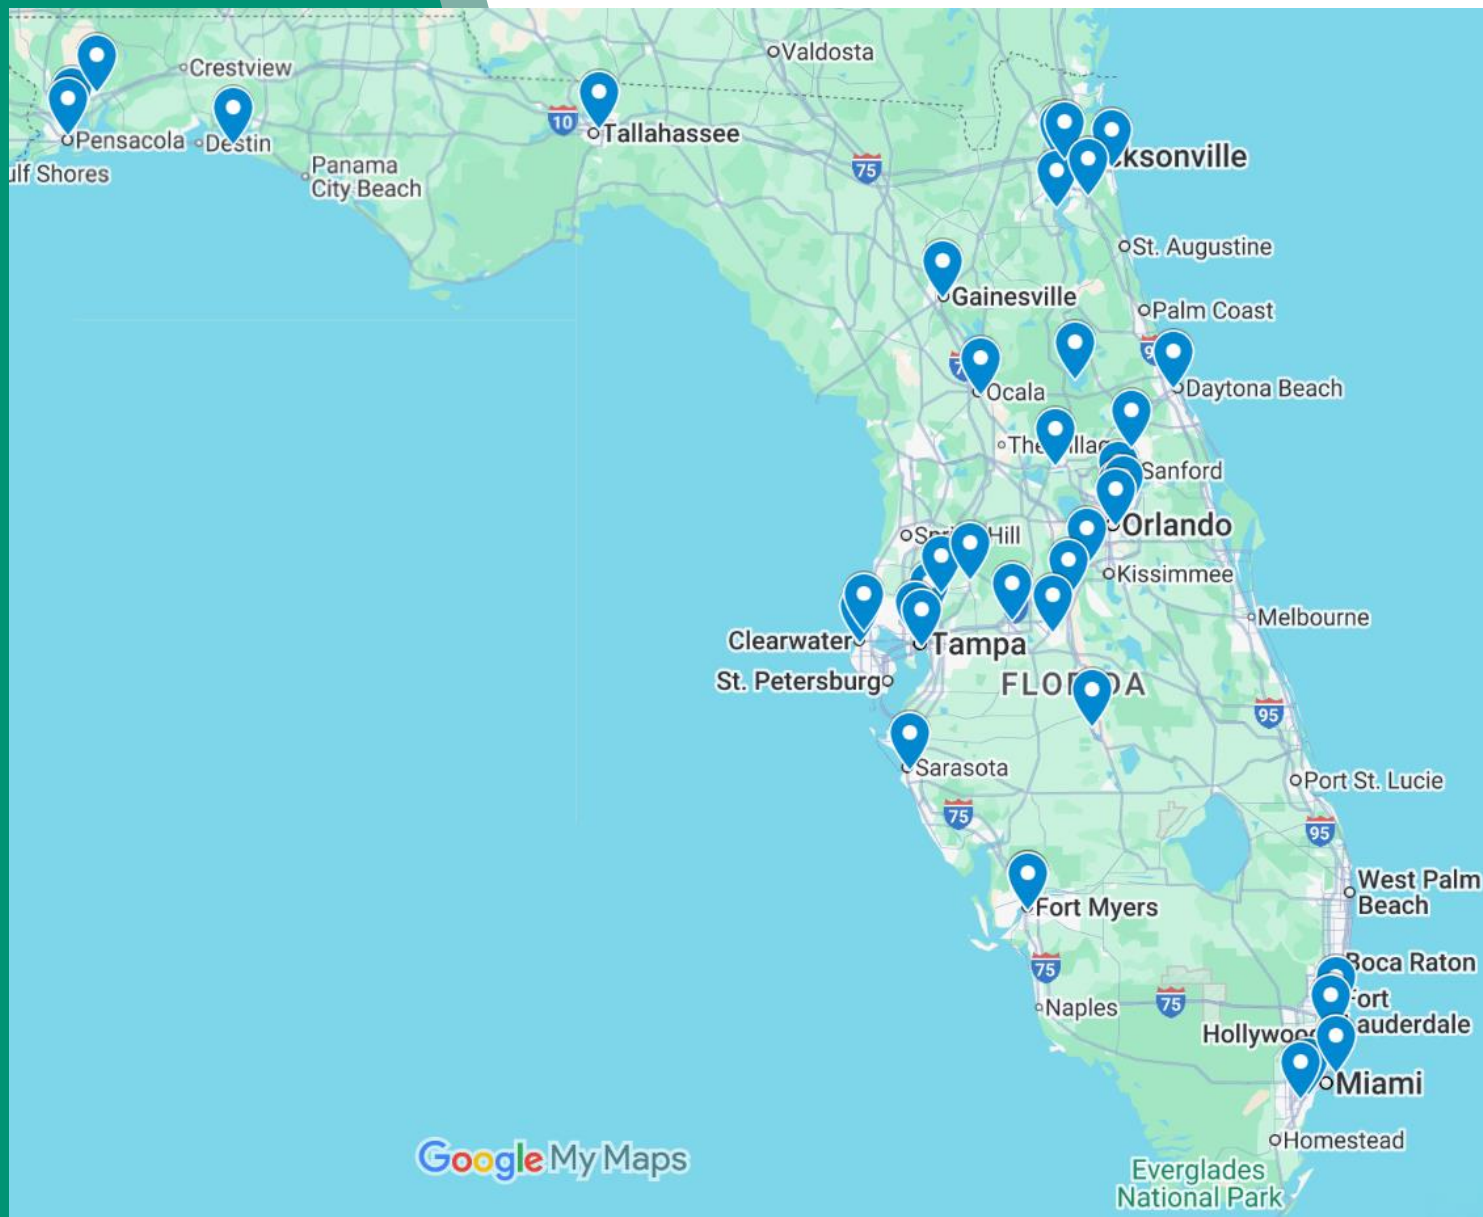

Patients with BP Cuff in Hand Before Discharge

40 Florida LOMC Verified Hospitals

53% of births in FL, 2023
38% of maternity hospitals

LOMC Progress Update

13 hospitals have applications in progress

If all hospitals in progress achieve verification, 63% of Florida births will occur at verified hospitals

Including the total number of currently interested hospitals, LOMC has the potential to cover 74% of Florida births

Has your hospital achieved
Levels of Maternal Care
verification? Ask us how.
