The USF Health Byrd Alzheimer’s Institute at the University of South Florida is seeking a candidate to fill the Eric Pfeiffer Endowed Chair in Alzheimer’s Disease Research. We are inviting applications from qualified candidates at the Associate or Full Professor level to occupy the position. This is a full-time, academic position through the Department of Neurology, Morsani College of Medicine. As a member of the Morsani College of Medicine faculty, this person will be engaged in patient care, research, teaching and service. The candidate will be expected to chart and execute a strategic plan for an independent clinical research program and expansion of clinical services in Alzheimer’s disease. Opportunities for collaboration with world-class basic scientists in Alzheimer’s disease are readily available within the Institute. In addition to the support provided by the Endowed Chair, Institute resources have been earmarked for the support of this position and related activities.

Requires an MD or equivalent and board certification in Neurology or Psychiatry. Eligibility for a full, unrestricted Florida Medical License is a must. Must meet university criteria for appointment to the rank of Associate or Full Professor. The selected candidate must have actively funded research as well as the experience and skill to manage and grow their clinical practice.

**How To Apply**
Interested applicants should provide an updated, comprehensive curriculum vitae, including descriptions of active research projects and funding, and the names of at least three individuals who will serve as references online via Careers at USF (job opening 3278) [http://www.usf.edu/about-usf/work-at-usf.aspx](http://www.usf.edu/about-usf/work-at-usf.aspx).

The University of South Florida is an equal opportunity, equal access academic institution that embraces diversity in the workplace. According to Florida Law, applications and meetings regarding them are open to the public. For ADA accommodations, please contact Maxine Roth at (813) 396-0746 or mroth@health.usf.edu at least five working days prior to need.
MISSION STATEMENT

The USF Health Byrd Alzheimer's Institute is dedicated to the prevention, treatment and cure of Alzheimer’s disease and related disorders.

The key activities of the Institute with respect to Alzheimer’s disease, Parkinson’s disease and related disorders include:

- Conducting laboratory research to develop new therapies
- Conducting clinical trials to test treatments
- Providing state-of-the-art diagnostic evaluations and patient care
- Supporting caregivers by providing educational programs, support groups, counseling and information
