Previously conducted every three years, NATA is now collecting salary survey data every two years to provide more timely information to the membership. The following data was collected in October and November 2016.

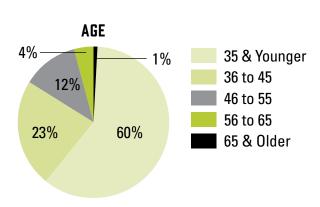

PARTICIPATION

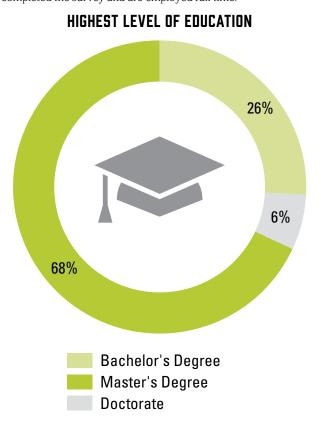

The 2016 NATA Salary Survey collected 8,717 responses, which is nearly 2,000 more participants than the previous survey in 2014 and represents 25 percent of certified NATA members. The majority of respondents work in the secondary school setting (39 percent), followed by college/university (31 percent) and clinic (18 percent).

DEMOGRAPHICS

The following figures represent demographics of participants who completed the survey and are employed full time.

AGE

SALARY SURVEY RESULTS

The average annual income for an athletic trainer was \$54,832 in 2016. Keep reading to see how salaries were affected by level of education, age, gender, ethnicity, location and more.

The following figures represent annual income for full-time positions only and do not include bonuses or benefits.

HIGHEST LEVEL OF EDUCATION	S AVERAGE ANNUAL INCOME 2016
Bachelor's Degree	\$ 48,498
Master's Degree	\$ 54,695
Doctorate	\$ 81,921

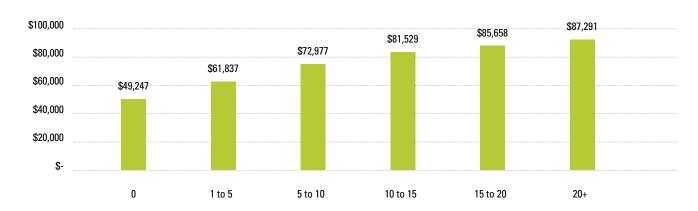

90,000						\$79,19
80,000				ው ድ 750	\$71,005	Ψ, σ, ι σ
70,000			\$56.020	\$65.752		
50,000 _{\$3}	\$42, 38,825	\$48,786				
40,0003 30,000						
20,000 10,000
