

“Walking the Walk in My Flipped Class”

Marcio Alves de Oliveira, PhD
Assistant Dean for Educational Innovation and Technology
University of Maryland, School of Public Health

Friday, September 5, 2014
12:00 pm
College of Public Health, Room 2016/2018

Dr. Marcio Oliveira is the first Assistant Dean for Educational Innovation of the School of Public Health at the University of Maryland College Park. In this capacity, Dr. Oliveira works closely with the campus' Center for Teaching Excellence (CTE), the Office of Information Technology (OIT), and the faculty and staff of the School of Public Health to provide leadership and support the school's educational mission. Dr. Oliveira is involved in several campus committees and funded initiatives related to the use of technology to enhance learning strategies. His leadership in the use of technology for teaching and learning has led him into acting as an advocate and mentor for several of his campus colleagues. Dr. Oliveira's students learn through a combination of face-to-face and online interactions that utilize multimedia data, social technologies, simulations, and visualization for individual and collaborative learning and for team projects. He is also a Research Assistant Professor at the Department of Kinesiology and his research focuses on the developmental process of neuromechanical variables throughout the lifespan.
