

*“Onchocerciasis and Malaria: lessons learned from their elimination in Ecuador”*

Mauricio Espinel, MD, MTM, PhD  
University of San Francisco de Quito, Ecuador

Tuesday, June 3, 2014  
12:00 pm  
Room 2016, College of Public Health

Dr. Mauricio Espinel is an Ecuadorian Tropical Medicine physician graduated from the School of Medicine at Universidad Central of Quito, Ecuador with a Master in Tropical Medicine at Foundation Oswaldo Cruz (Rio de Janeiro-Brazil) and a PhD in Epidemiology at the Liverpool School of Tropical Medicine, supported by and award from TDR/WHO having as research topic: Epidemiology and Health Impact Assessment of Road Construction in the Tropical Rainforest of Esmeraldas. He also carried out a Management for Improved Public Health (MIPH) training at the CDCs in Atlanta, Georgia. He assumed various leadership responsibilities at the Ministry of Public Health and the Ministry of Social Wellbeing of Ecuador. He has been consultant in tropical diseases and health research for various international agencies including PAHO, IDRC, World Bank, and UNAIDS. For the last 10 years has been professor of Epidemiology and Tropical Medicine at the Universidad San Francisco de Quito Ecuador. He has worked in national leadership positions as well as in the first lines of combat for the control and elimination of onchocerciasis, malaria, HIV, Typhoid fever, dengue, and intestinal worms in his country. He has a dozen of publications in peer reviewed journals and book chapters. Currently, he advises many organizations of the civil society and is the Speaker of the National Ecuadorian Health Forum.
