Awards Ceremony

7:25 - 8:10

Dean's Lecture: *Water and Public Health*. Victor W. Sidel, MD

8:10 – 8:30

Discussion

For nearly 30 years, **Mr. Stewart** was the Executive Director of the Environmental Protection Commission of Hillsborough County. He aggressively led the clean-up of pollution, improvement of primitive sewage treatment facilities and stopped runaway development. Although retired for 10 years, Mr. Stewart continues his work for the environment by sharing his knowledge with local school children and civic and social groups.

Victor W. Sidel, MD will give the Dean's Lecture, *Water and Public Health*: the role of cooperative national and international actions to solve the health problems of unsafe water and to mitigate the dangers of armed conflict when water is scarce. Dr. Sidel is the distinguished University Professor of Social Medicine at Montefiore Medical Center and the Albert Einstein College of Medicine. He has published widely on the topic of war and public health. Most recently he co-authored the editorial "Water Rights and Water Fights: Resolving Conflicts Before They Boil Over," which will be published in the *American Journal of Public Health*.
