

## Installing Dragon Medical One on Local PC

- **[Click here to download the file](#)** and follow the instructions from the IS website  
(The zip file that you have downloaded is called “standalone.zip”)
- Double click on the “standalone.zip” file that you just downloaded.
- Right click on the folder named "Standalone" and click “copy”
- Click on My Computer

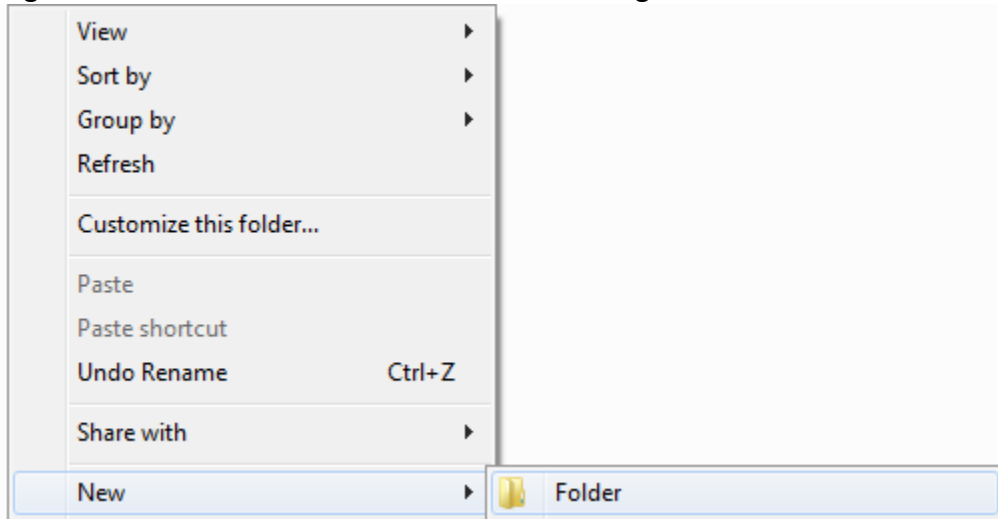

- Click on the C drive

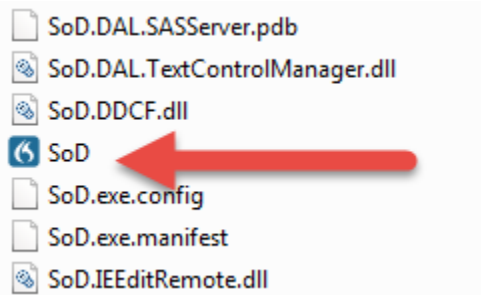

- Click on Program Files

- Right Click and create a new folder. Name it "Dragon One"

- Open Dragon One folder
- Right click and paste copied folder
- You should now have a folder called Standalone
- Open Standalone folder
- Look for the Icon called "SoD and highlight it by single clicking on it"

- Right click “SoD” and choose “Pin to Taskbar
- You will now have an Icon on your taskbar to run Dragon Medical One
