

The Genomics of Global and Planetary Health Symposium

March 15th, 2019

Sponsored by:
USF Genomics Program
Global Health and Infectious Disease Research Center
College of Public Health Global and Planetary Health Strategic Area

The USF Genomics Program and GHIDR Center's annual symposium explores varying aspects of global health research by presenting the frontiers of innovative science and technologies related to the intersection of public health and genomics. The 2019 Symposium will focus on the study of genomics in a global context and will highlight researchers from the recently expanded USF Genomics Program. Participants from all colleges at USF are welcome to partake in this interdisciplinary symposium.

Symposium Schedule – Friday, March 15th

8:30 AM	Registration
Morning	Genomics Faculty Lectures
Lunch	Poster Session & Lunch
Afternoon	Turbo talks* Genomics Faculty Lectures Summary & Discussions
4:00 PM	Closing Remarks

*Short presentations selected from poster abstracts submitted by students and post docs.

Registration and Abstract submission:

Register for the symposium and submit abstracts at the following link:

https://usfhealth.az1.qualtrics.com/jfe/form/SV_daGVxo370UfcPVb

The deadline to register and submit abstracts is Monday, March 10th at 11:59 PM.

Abstracts may be submitted for posters and turbo talks and should identify the presenting author. This information is important for the award competition and planning only (there will be no program published); it is permitted to submit abstracts presented at Research Day or other conferences.

The Genomics of Global and Planetary Health Symposium will be held at the Interdisciplinary Research Building (IDRB) in Research Park. Please email questions to genomics@health.usf.edu.
